bar binary balanced 4c

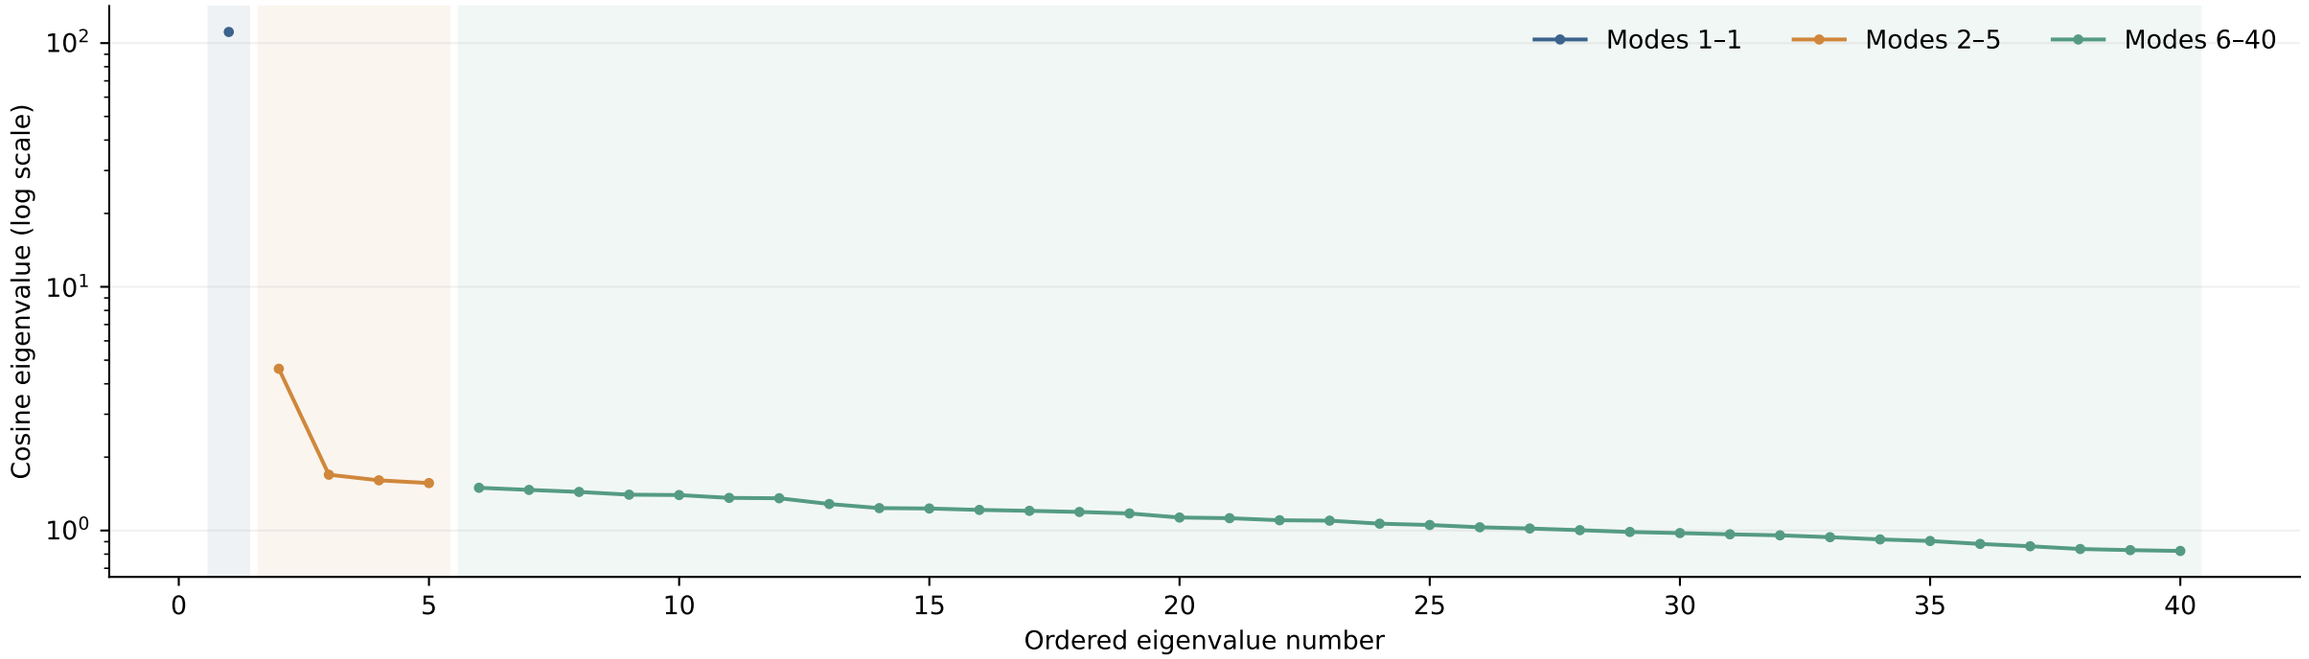

Generator clusters: 4; each cell shows agreement and TBS cluster count

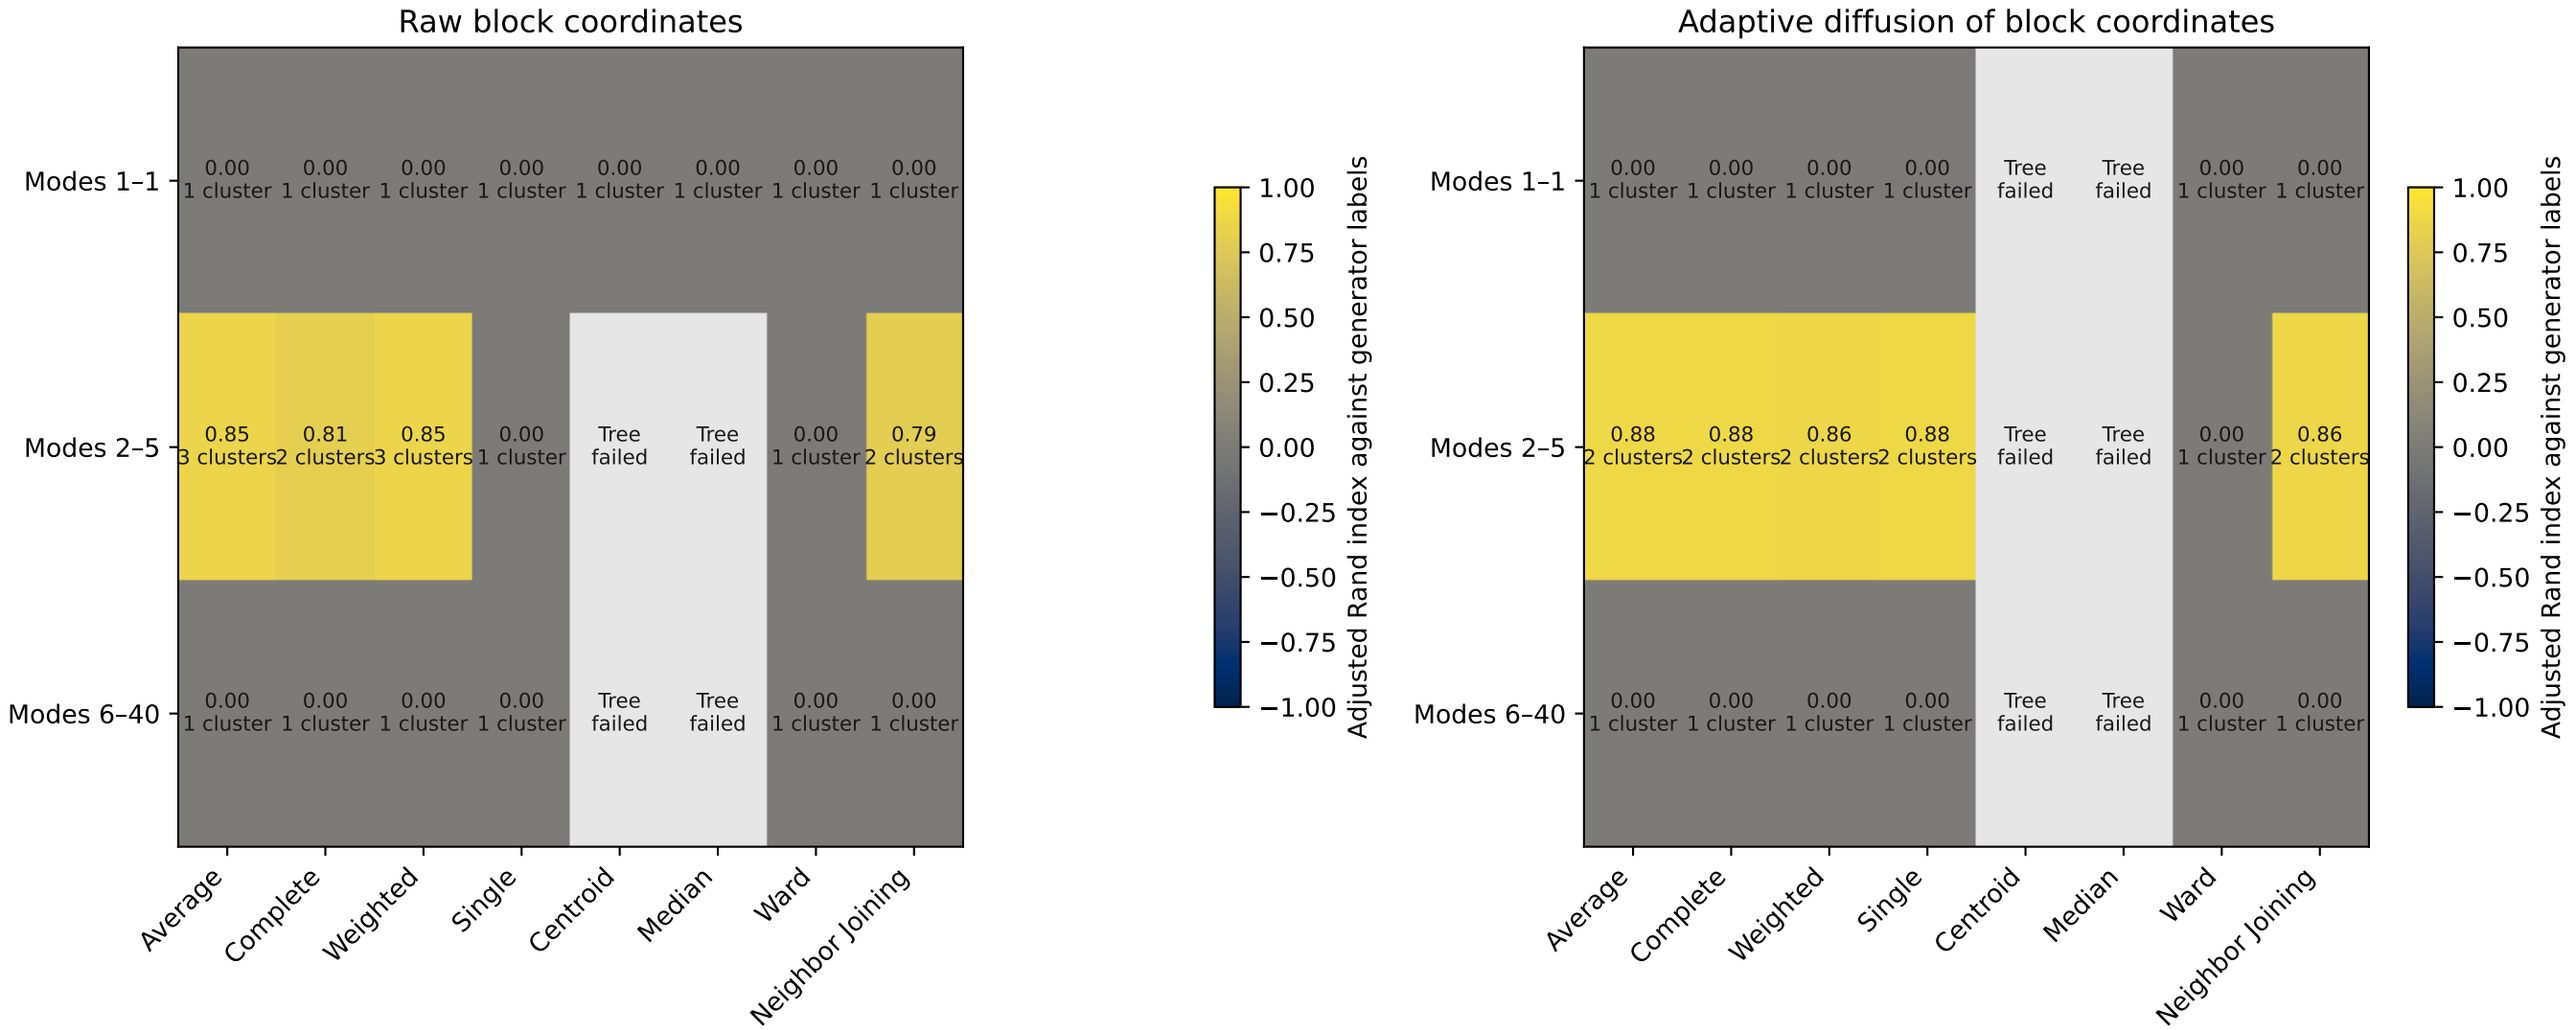

One fixed seed per example. Failed and unsupported cells are unavailable. Support thresholds are not enforced; results are descriptive.

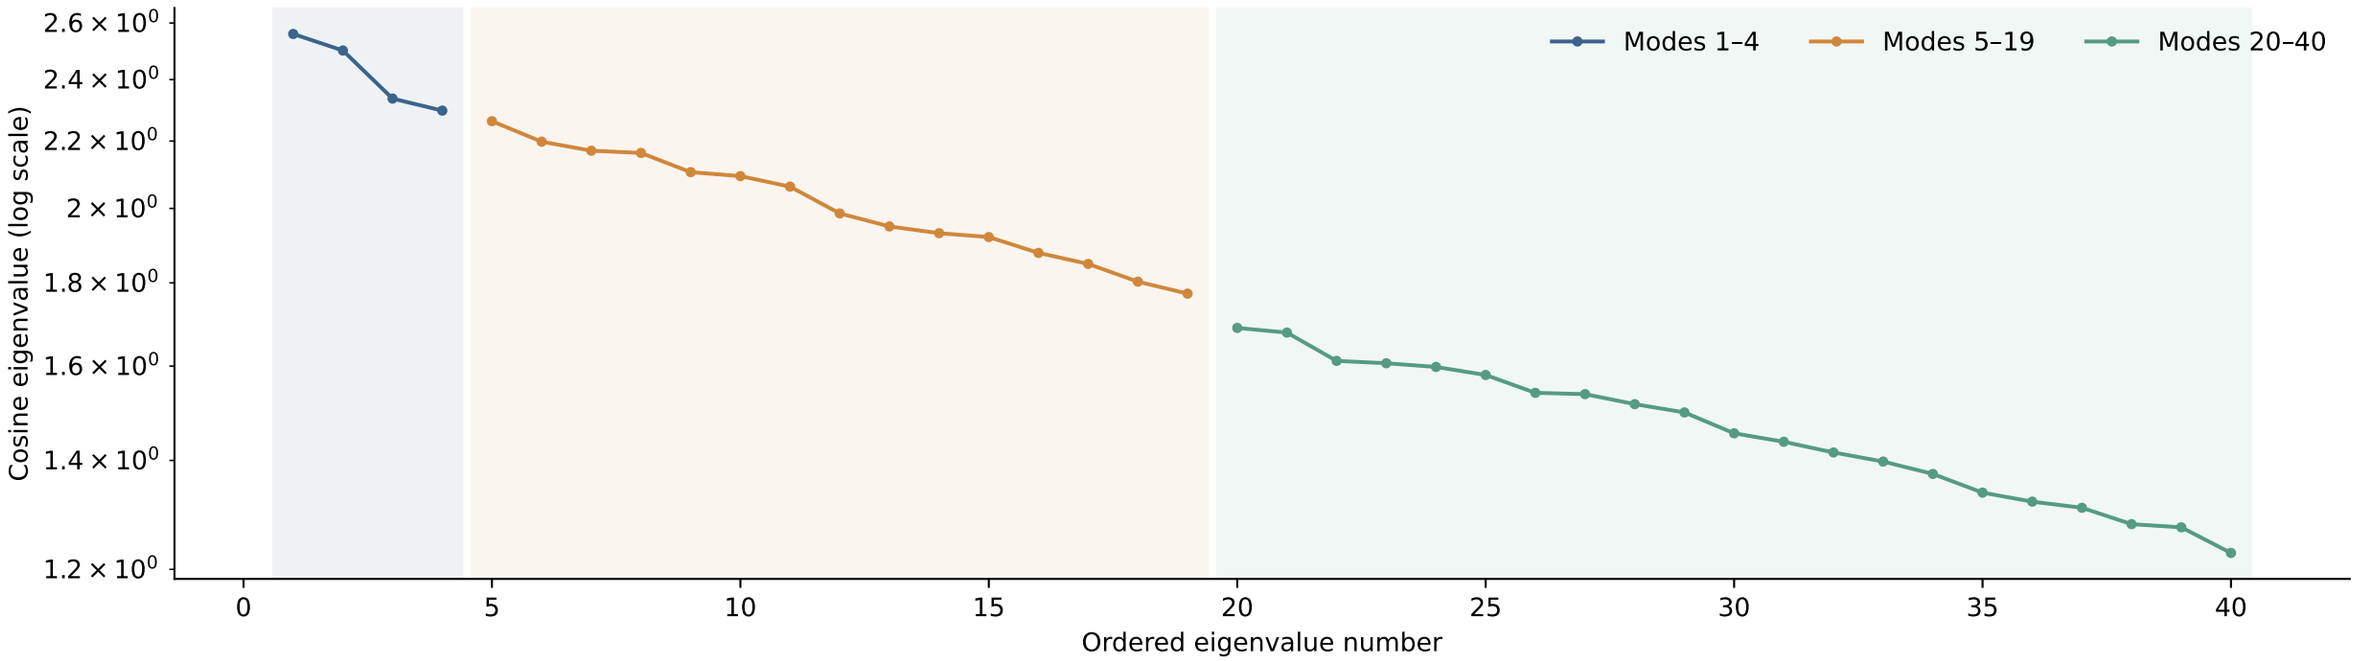

bar binary unbalanced 95 5
Generator clusters: 4; each cell shows agreement and TBS cluster count

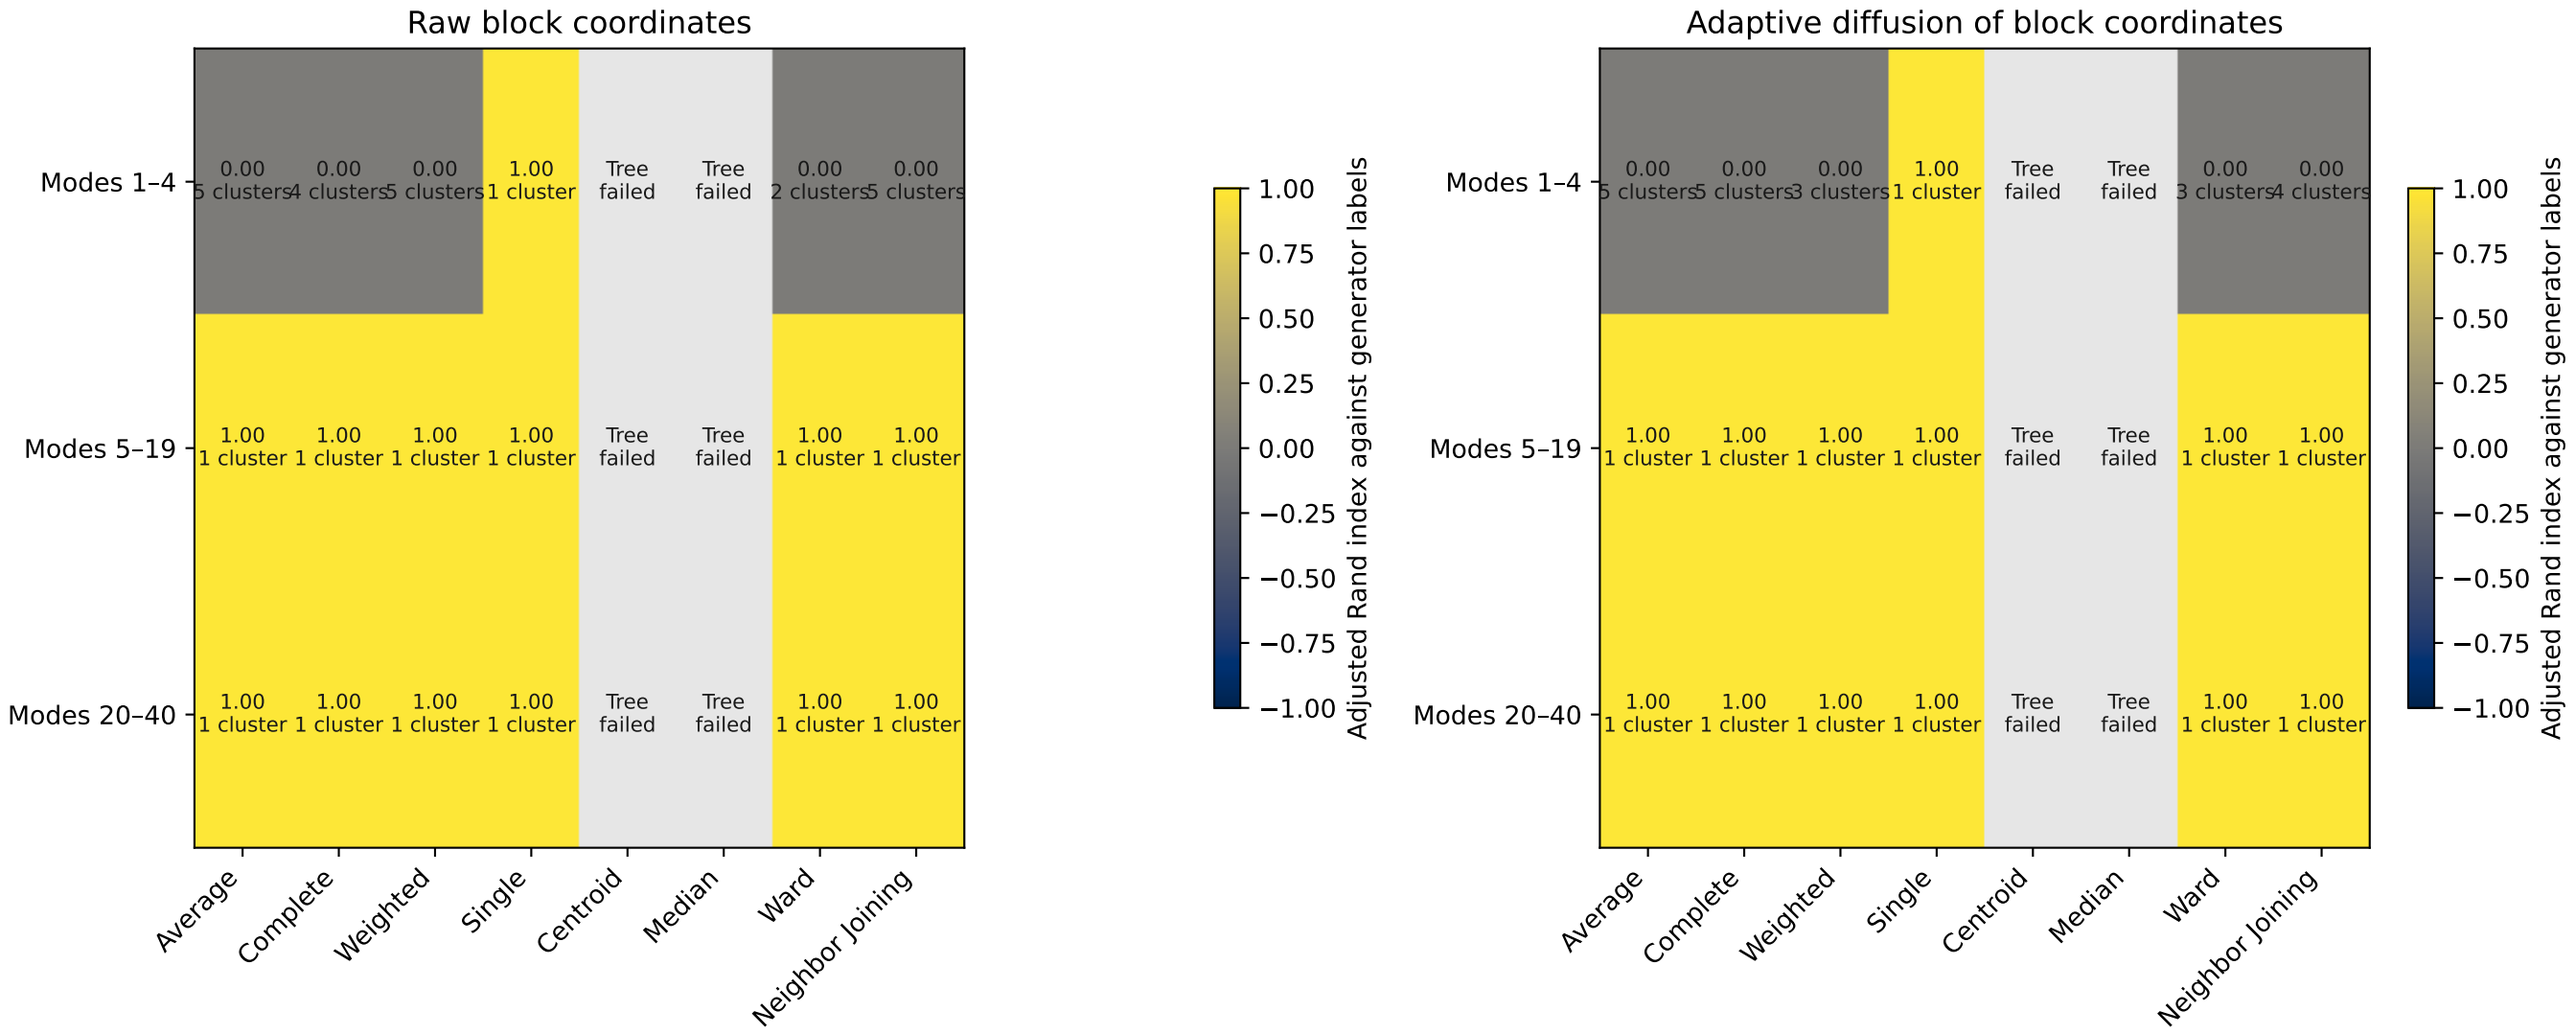

One fixed seed per example. Failed and unsupported cells are unavailable. Support thresholds are not enforced; results are descriptive.

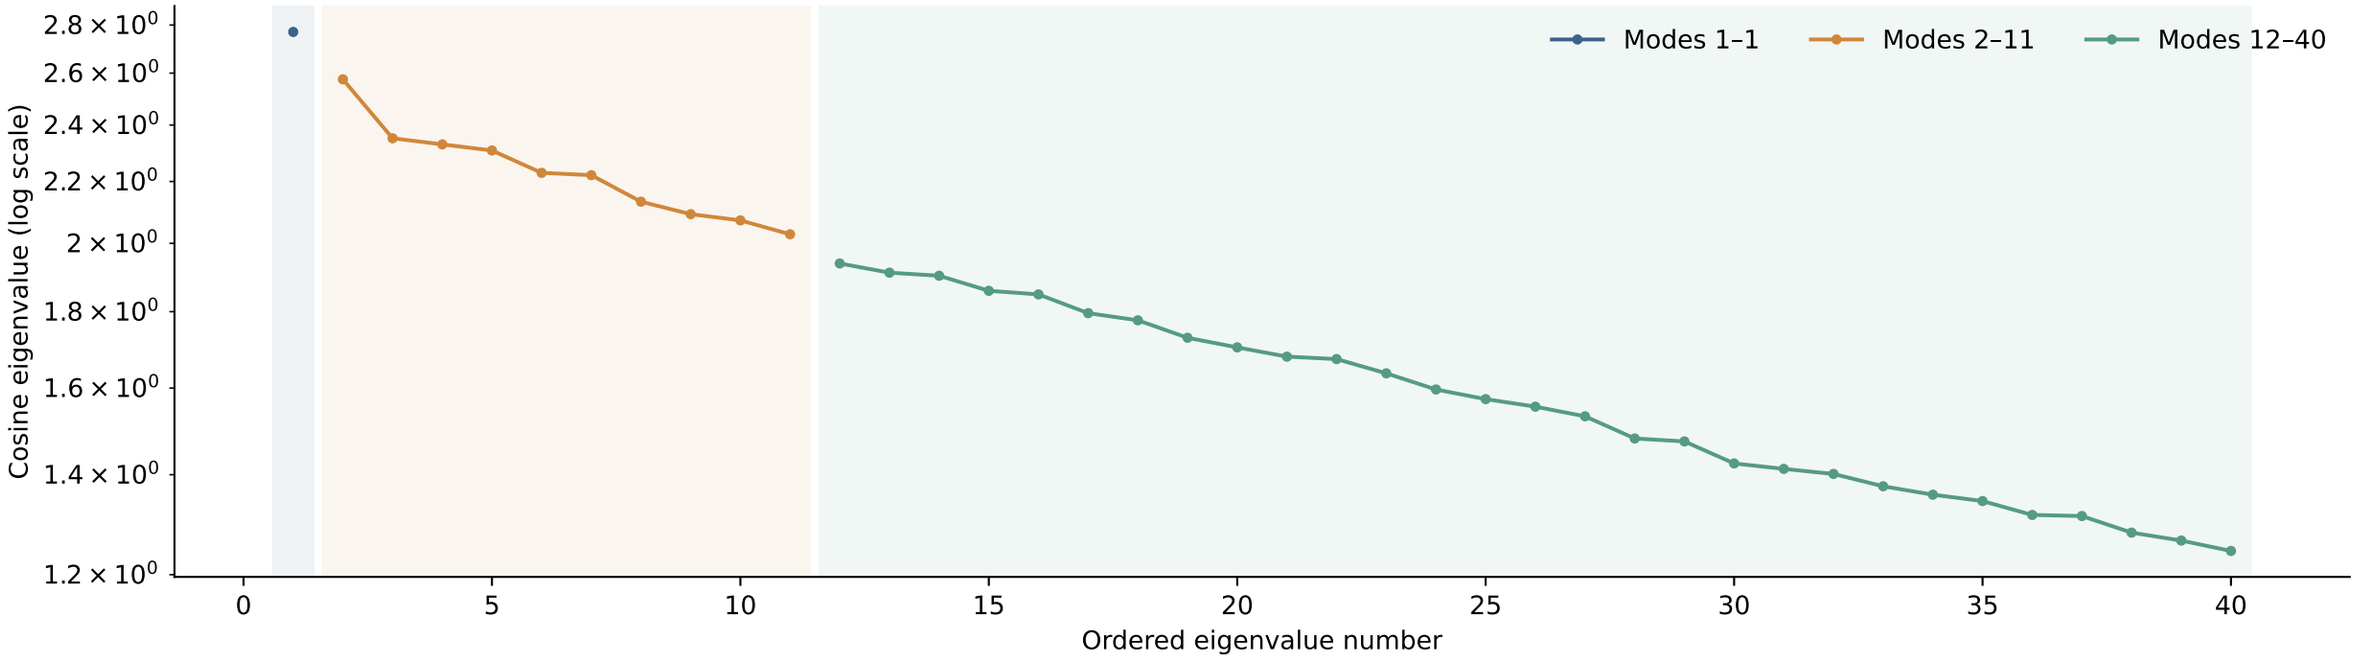

mp spike below bbp continuous
Generator clusters: 1; each cell shows agreement and TBS cluster count

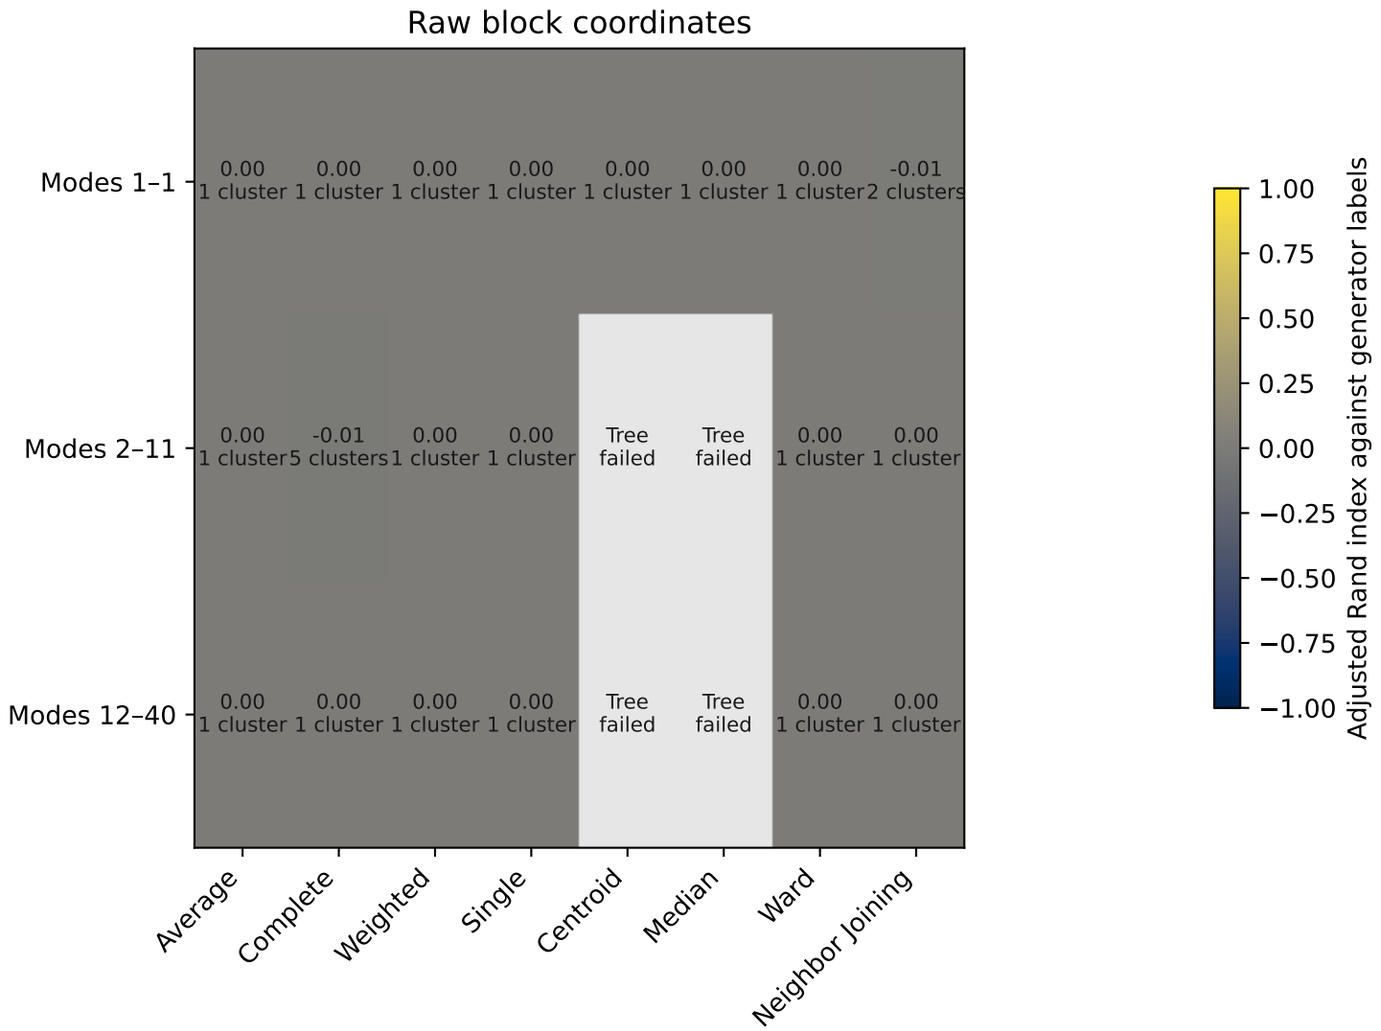

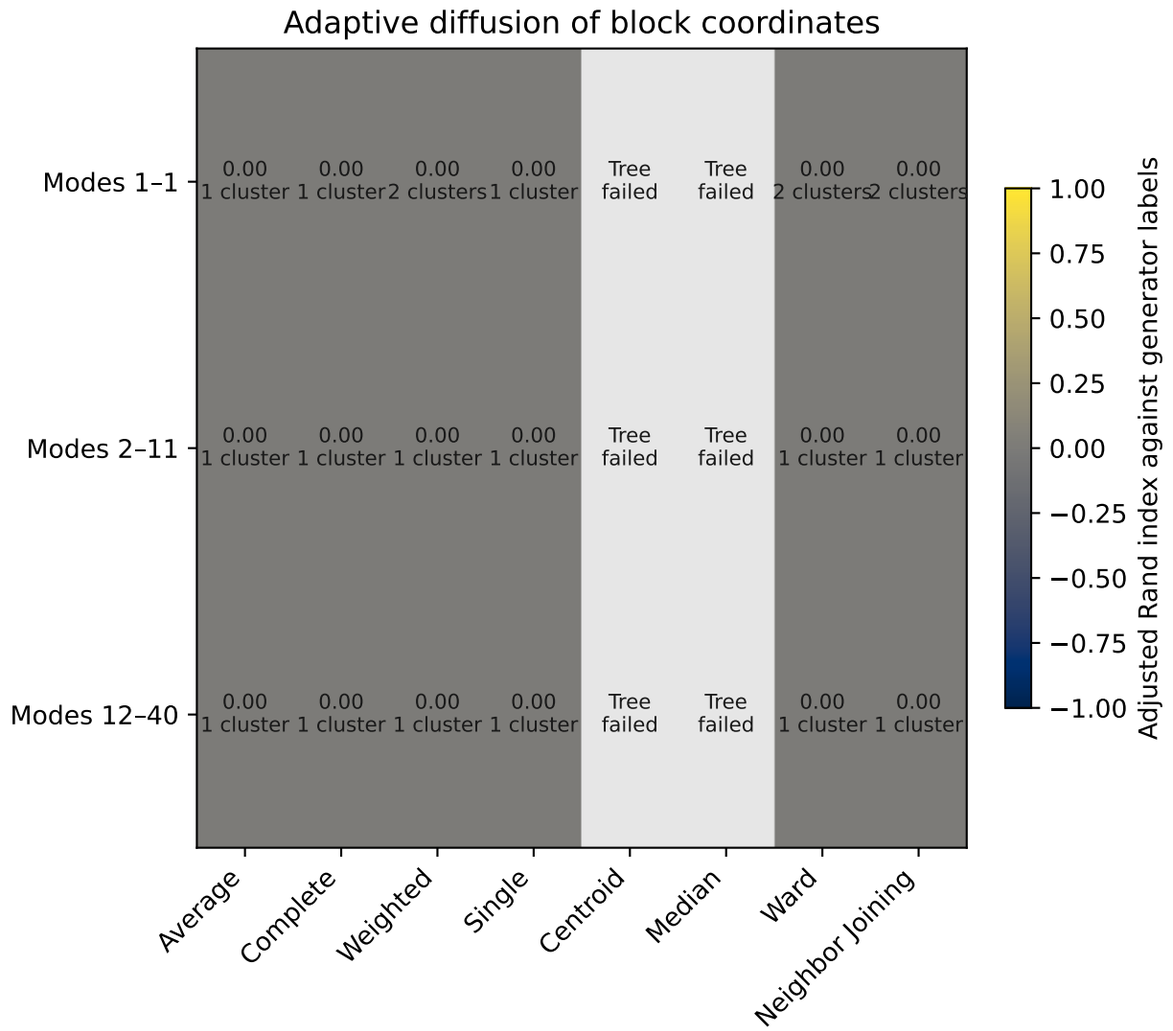

One fixed seed per example. Failed and unsupported cells are unavailable. Support thresholds are not enforced; results are descriptive.

mp spike above bbp continuous
Generator clusters: 2; each cell shows agreement and TBS cluster count

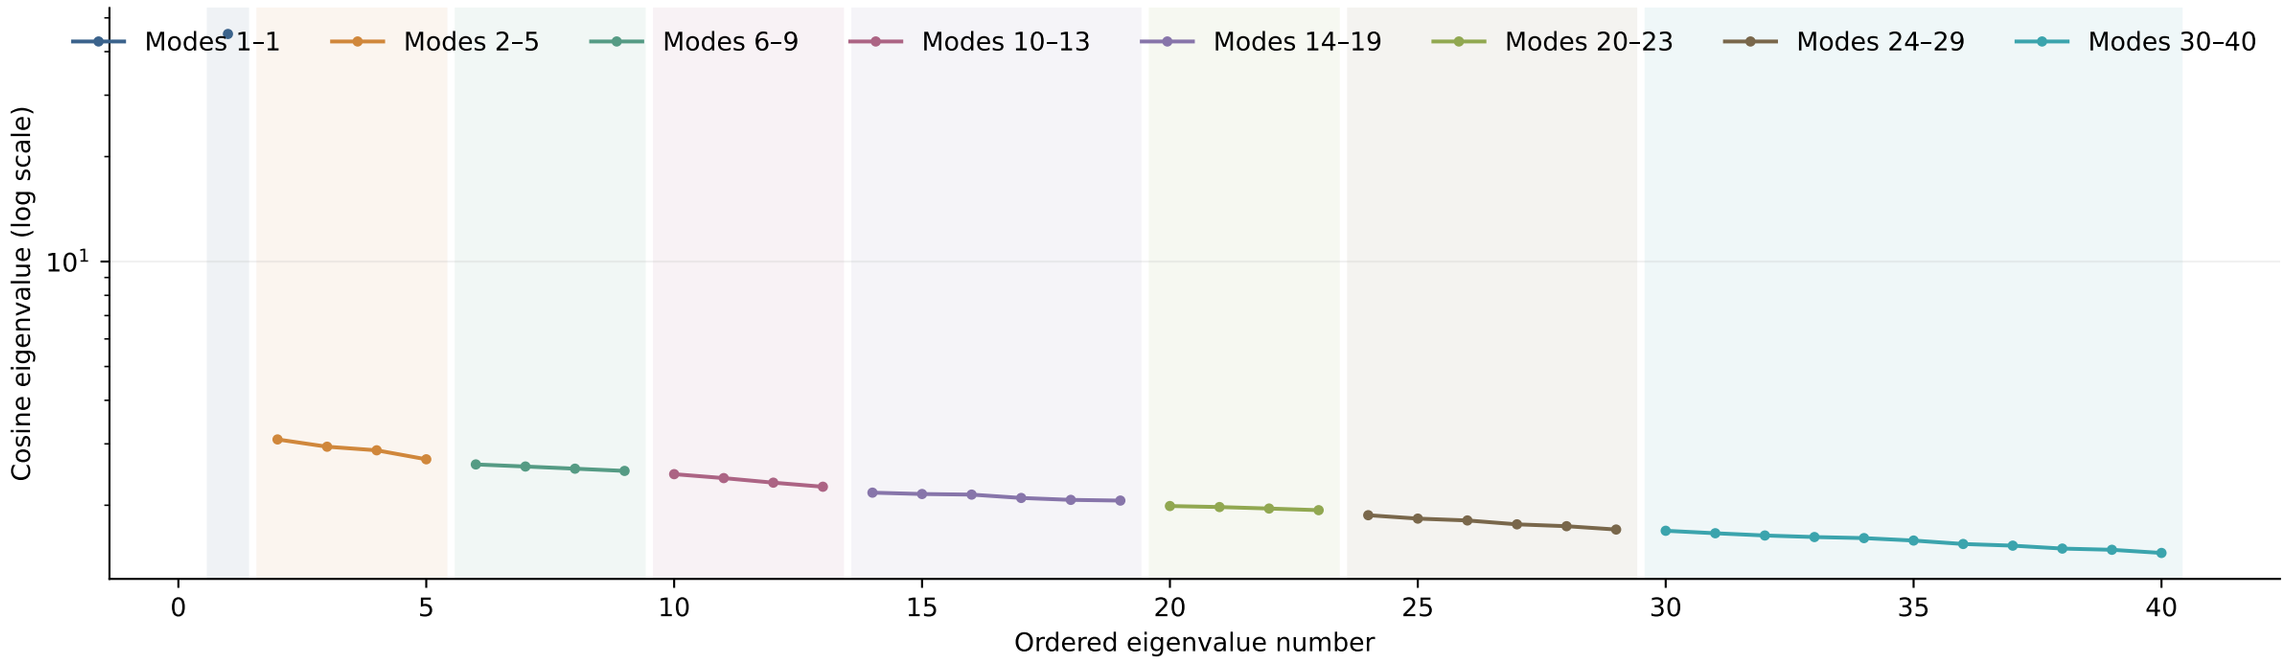

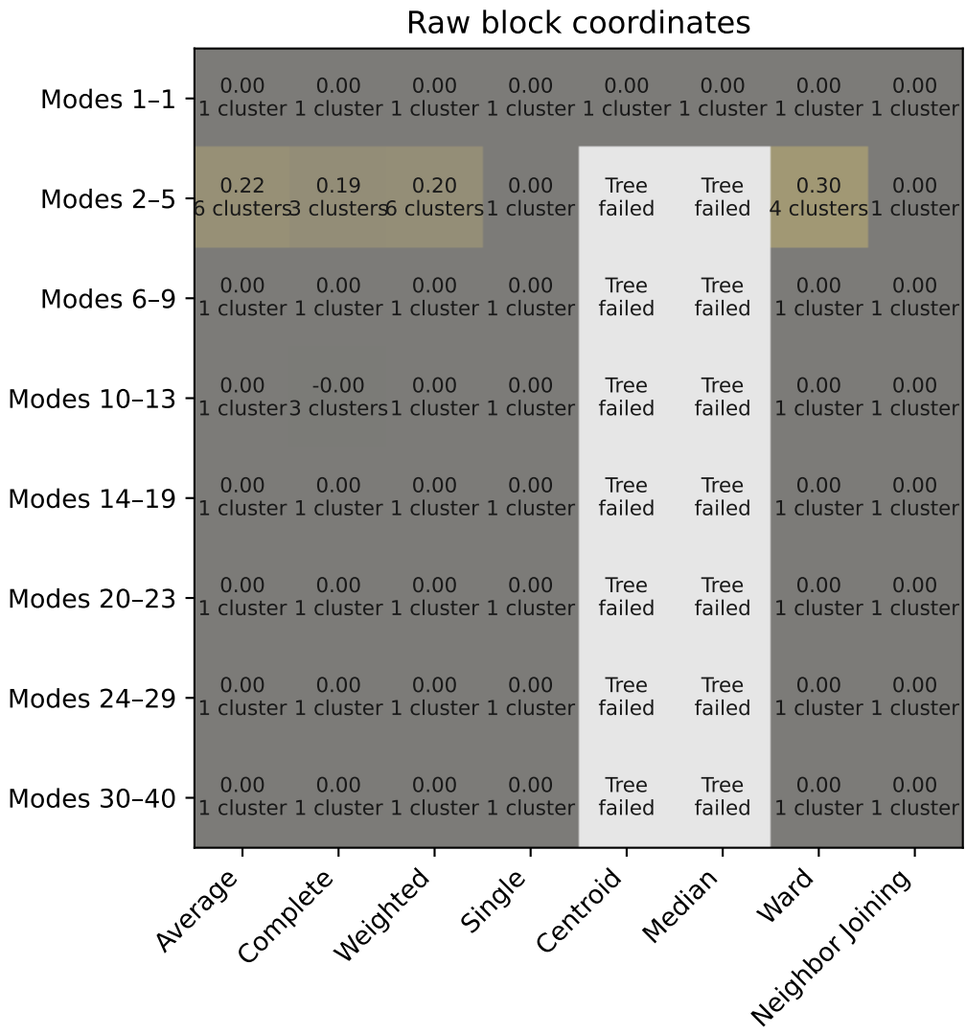

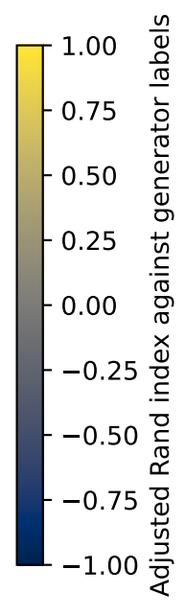

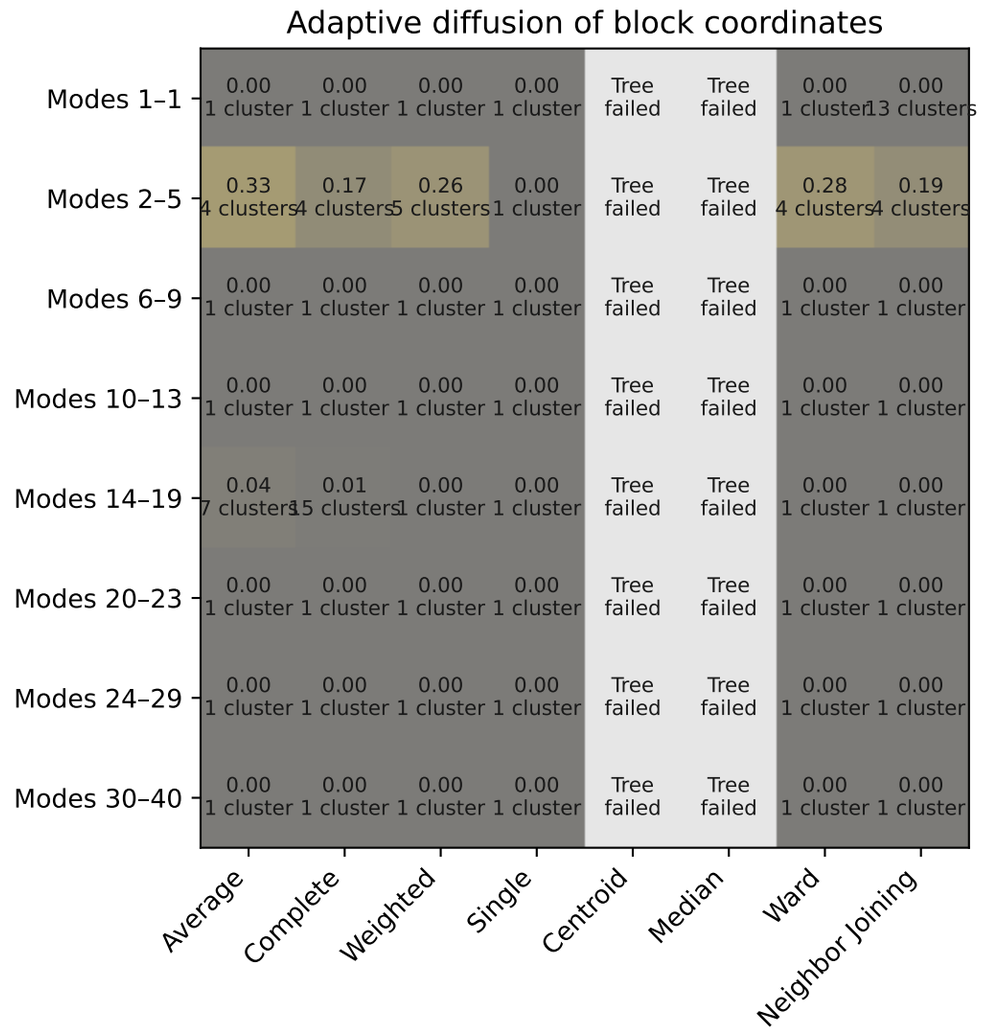

One fixed seed per example. Failed and unsupported cells are unavailable. Support thresholds are not enforced; results are descriptive.

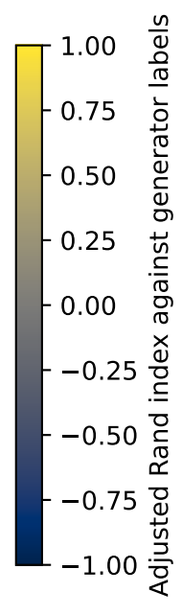

cat simplex face rare 20cat
Generator clusters: 4; each cell shows agreement and TBS cluster count

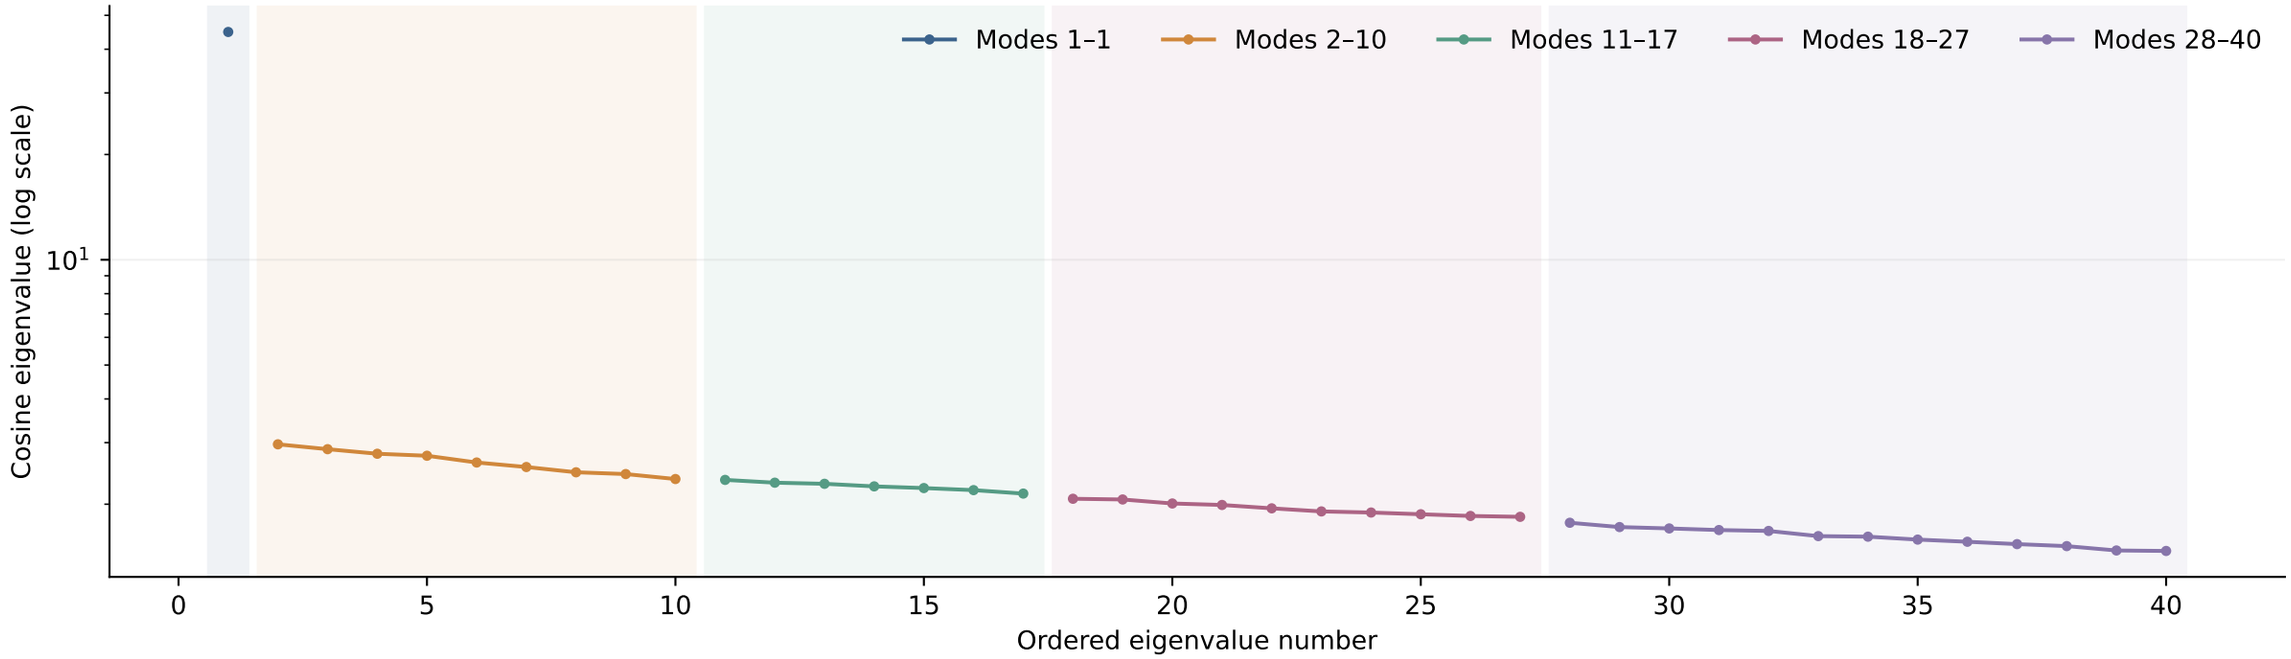

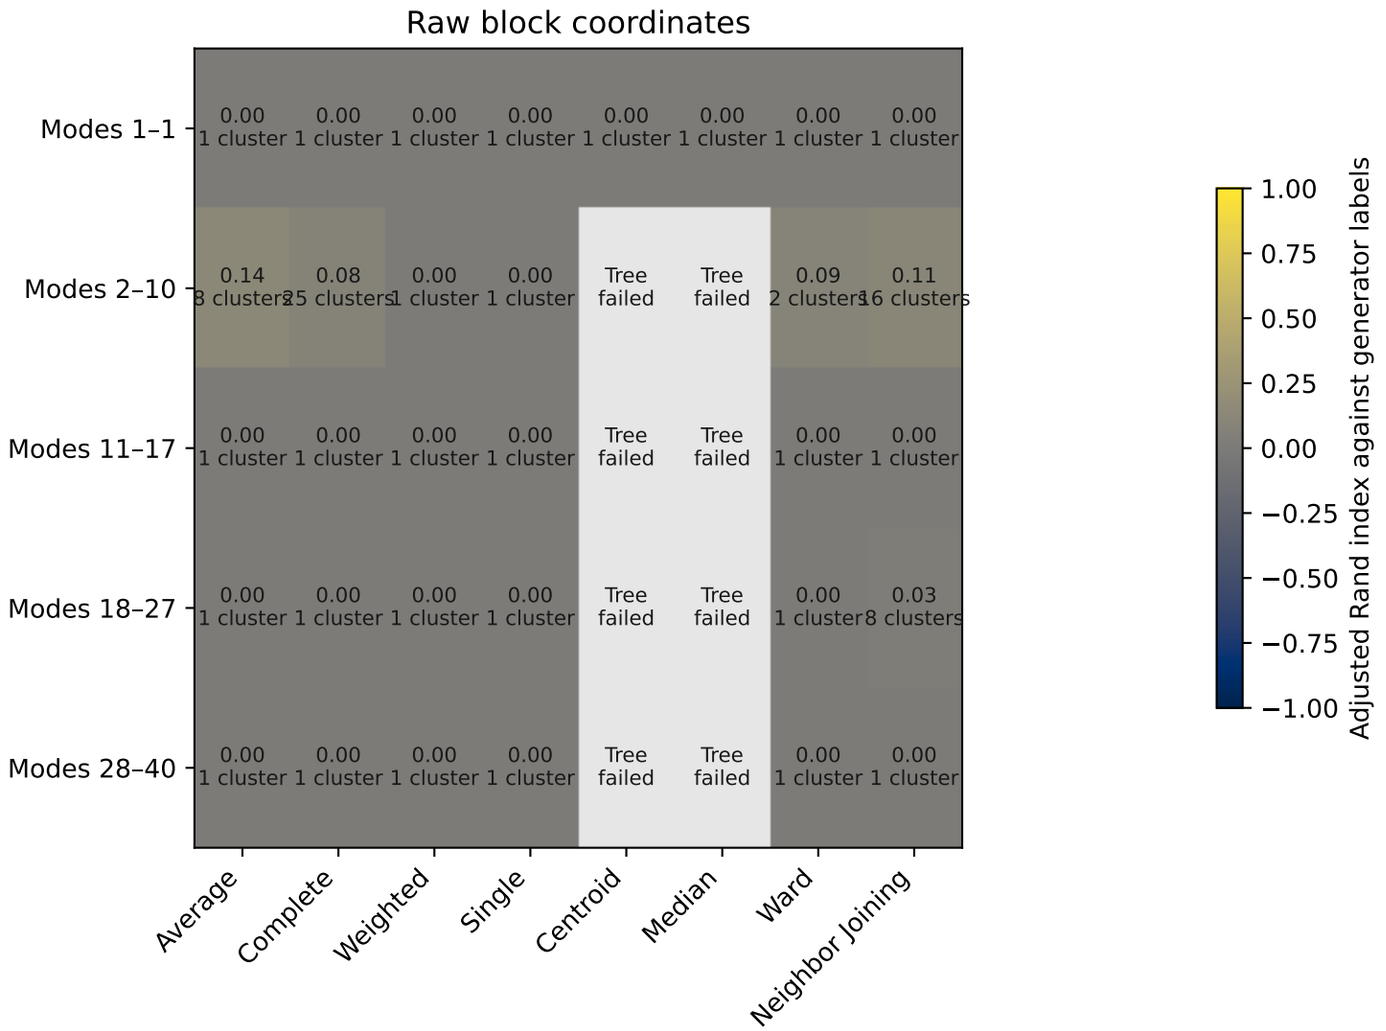

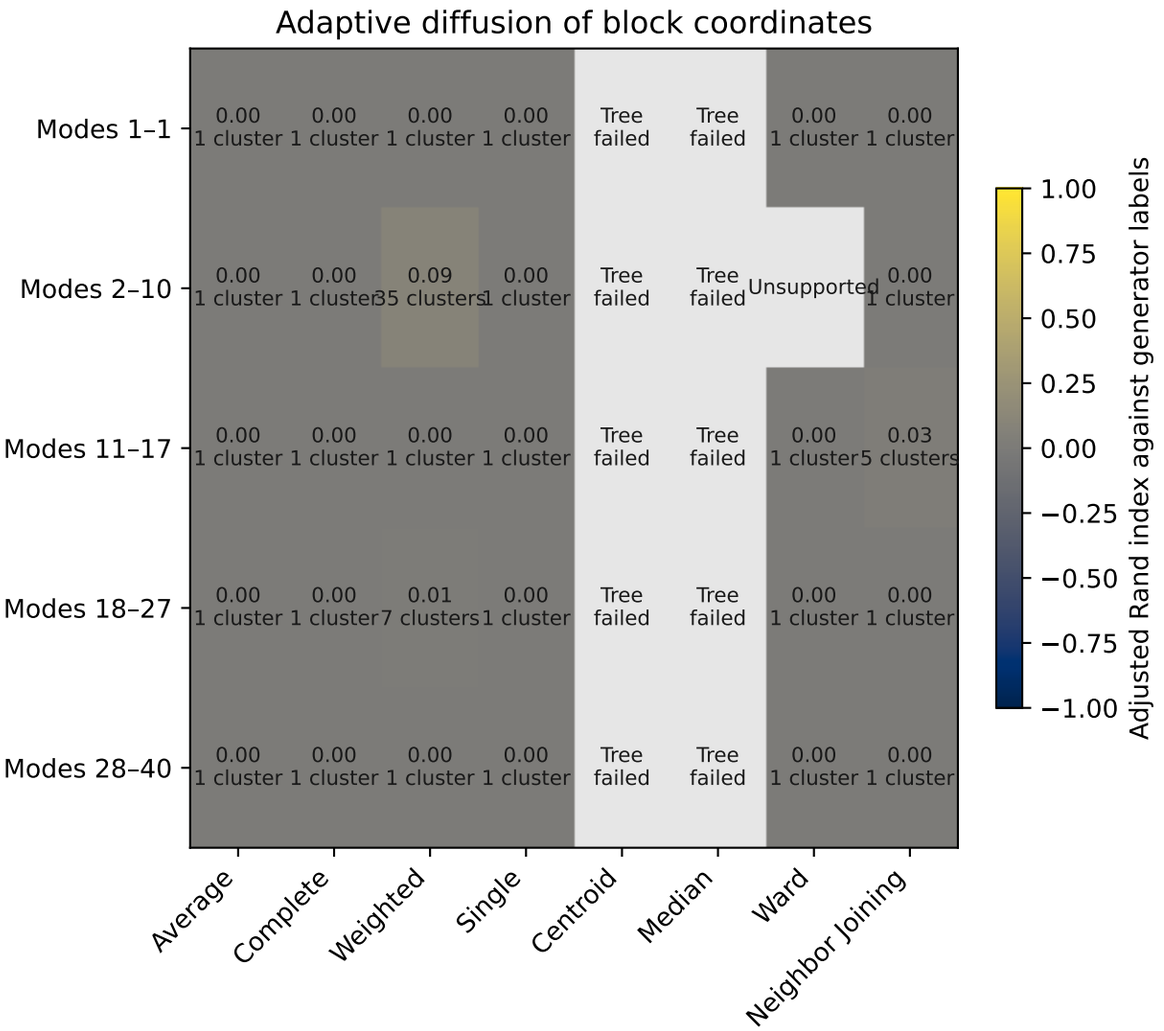

One fixed seed per example. Failed and unsupported cells are unavailable. Support thresholds are not enforced; results are descriptive.

cat dirichlet overdispersed 20cat
Generator clusters: 4; each cell shows agreement and TBS cluster count

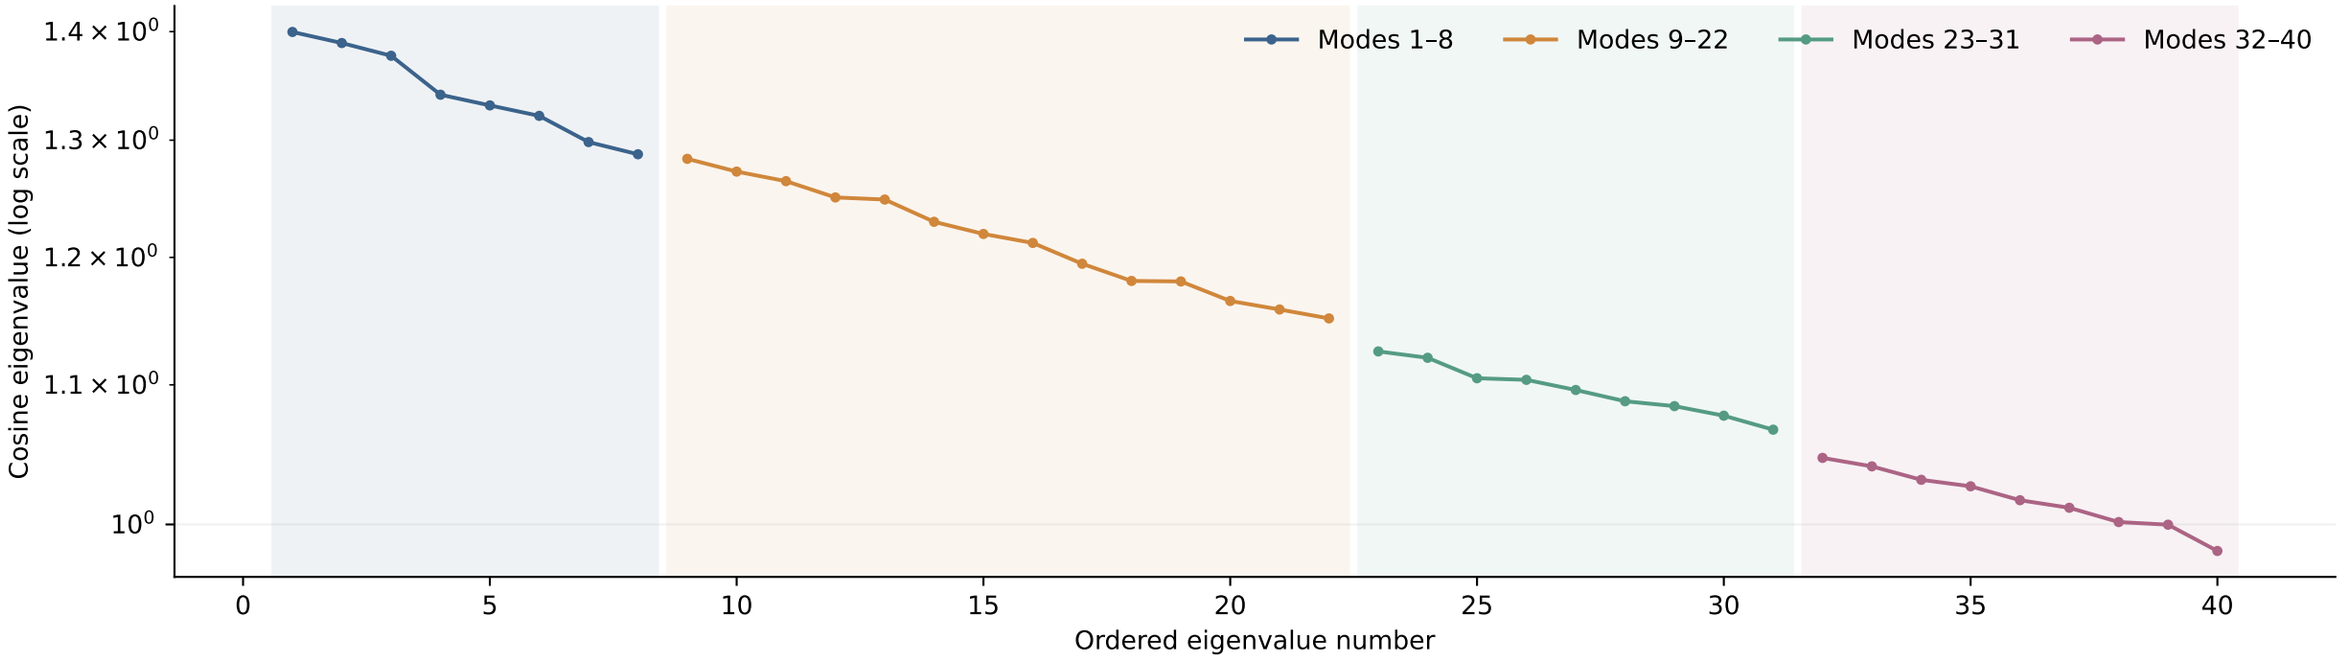

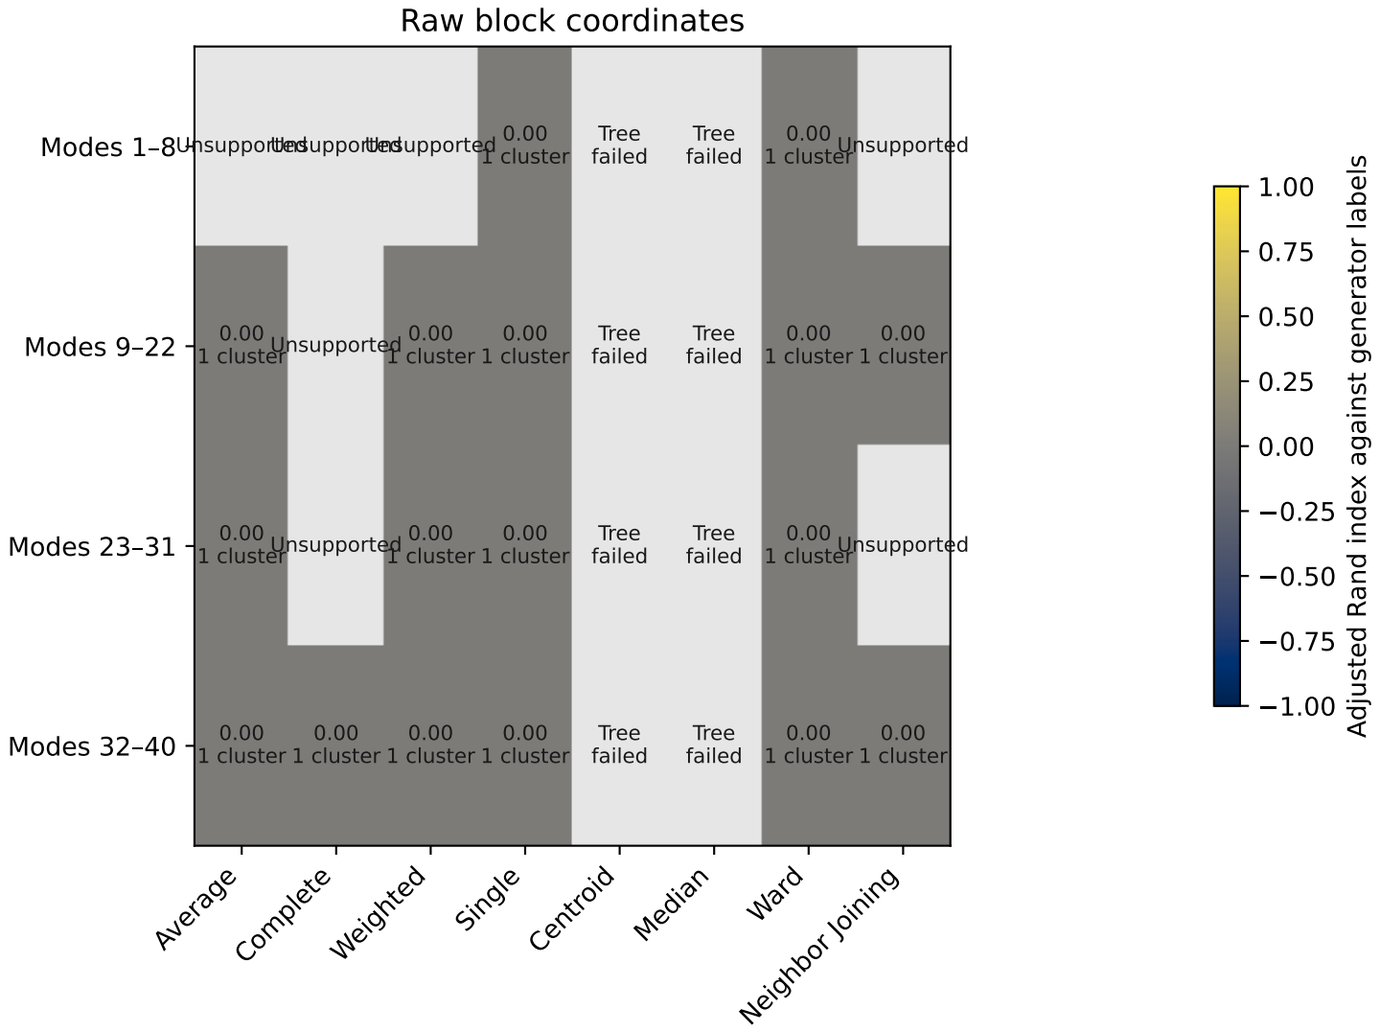

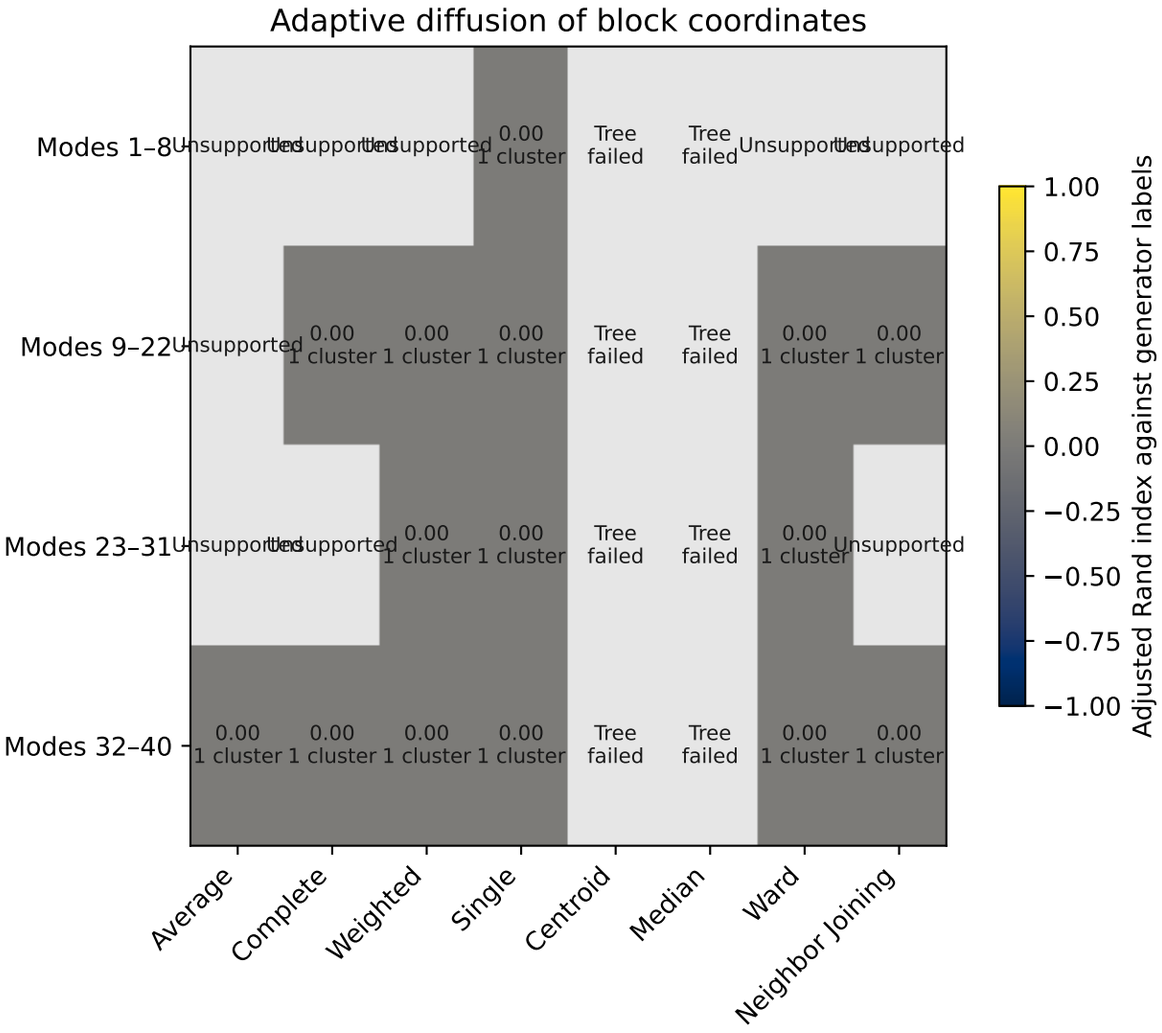

One fixed seed per example. Failed and unsupported cells are unavailable. Support thresholds are not enforced; results are descriptive.

cont lowrank pggn shrinkage
Generator clusters: 4; each cell shows agreement and TBS cluster count

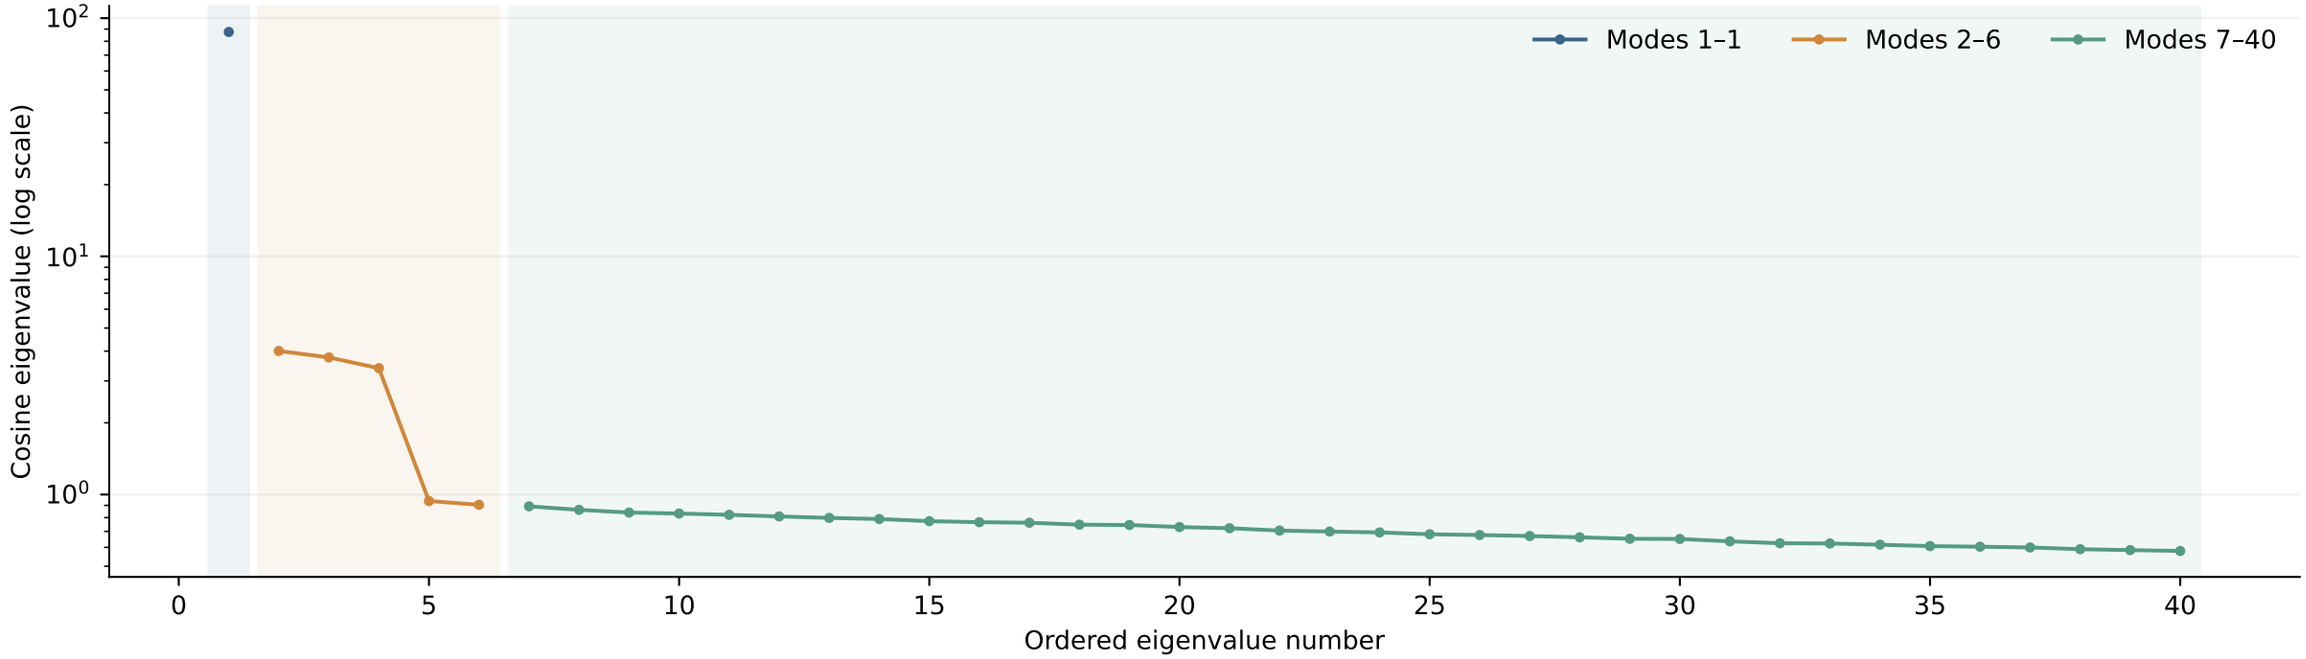

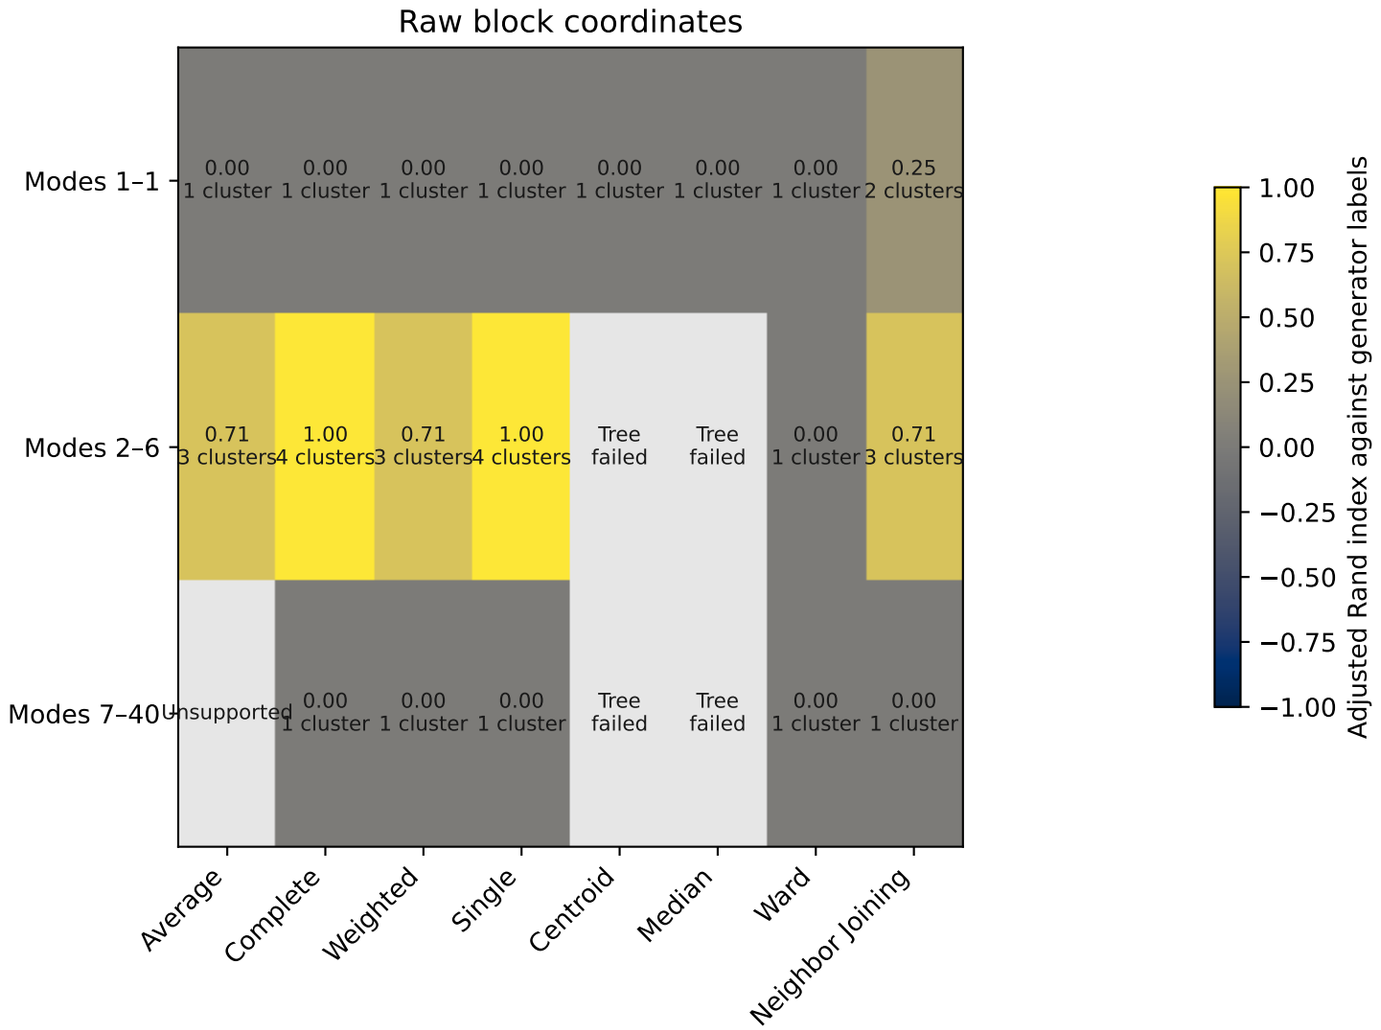

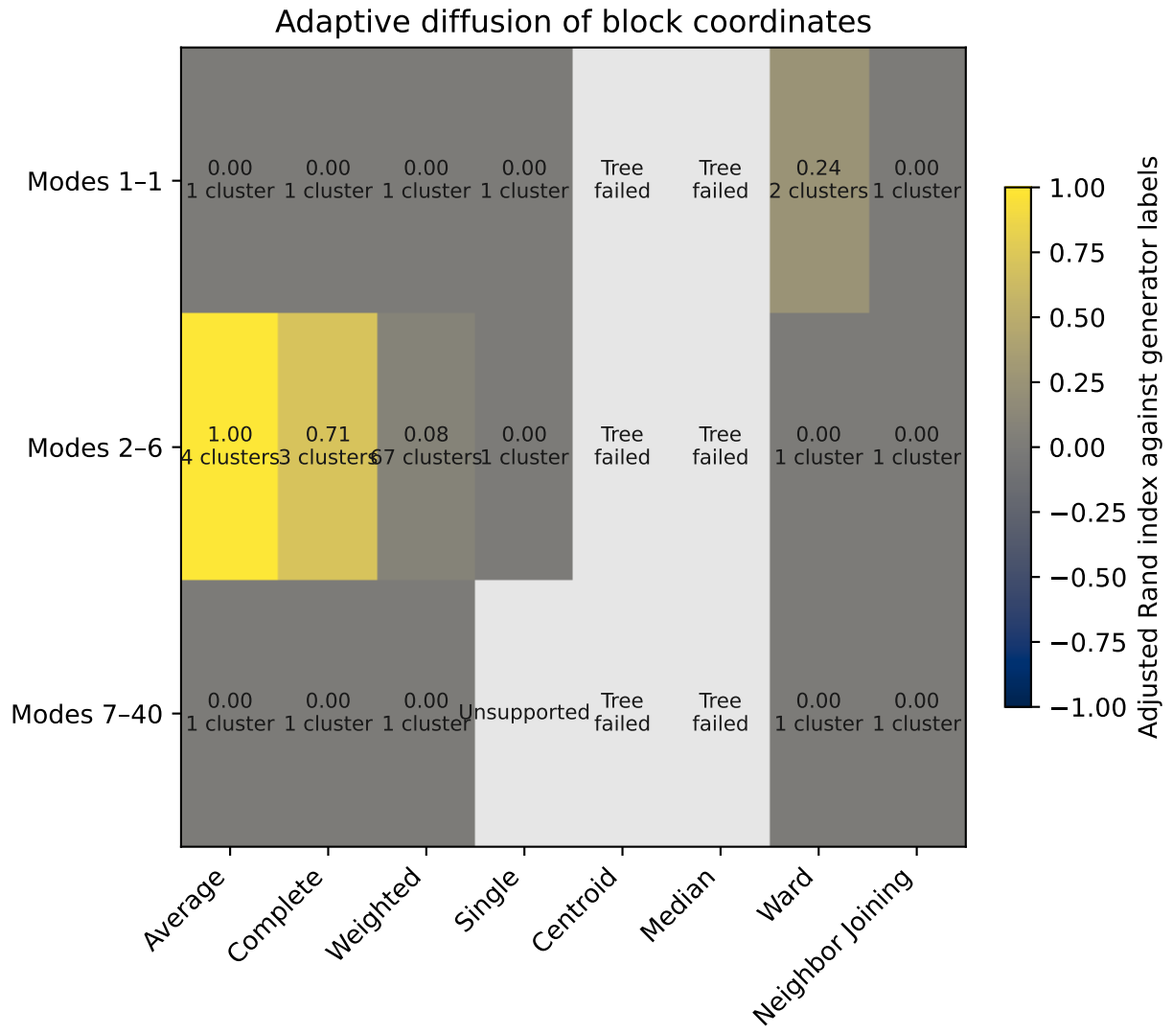

One fixed seed per example. Failed and unsupported cells are unavailable. Support thresholds are not enforced; results are descriptive.

support selected only fail closed
Generator clusters: 4; each cell shows agreement and TBS cluster count

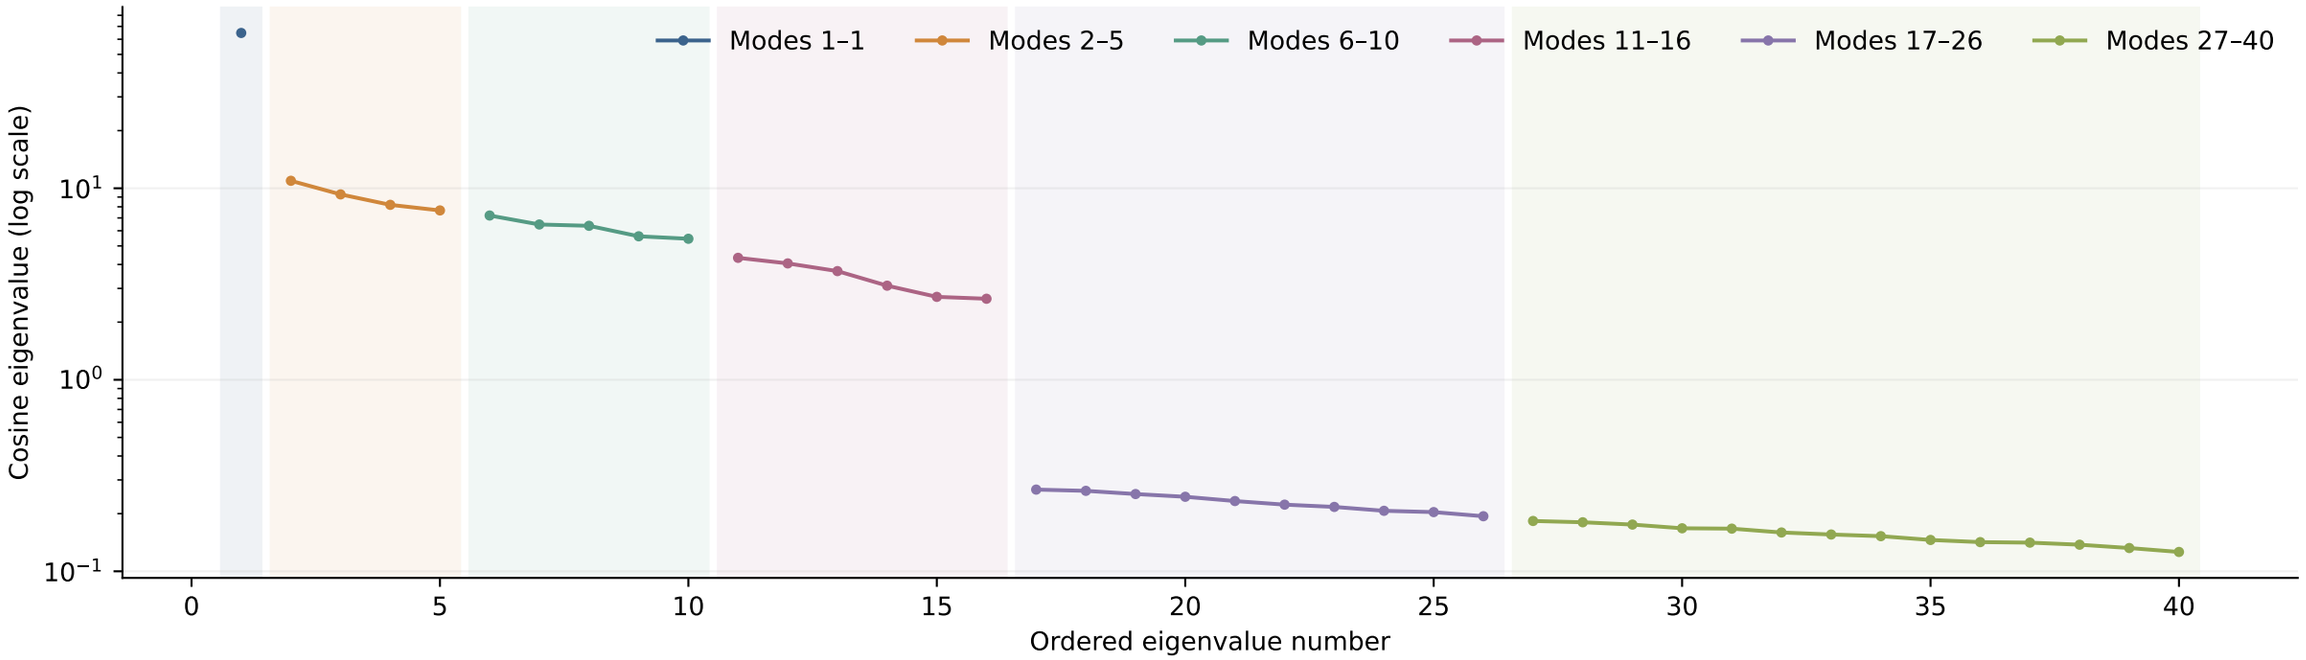

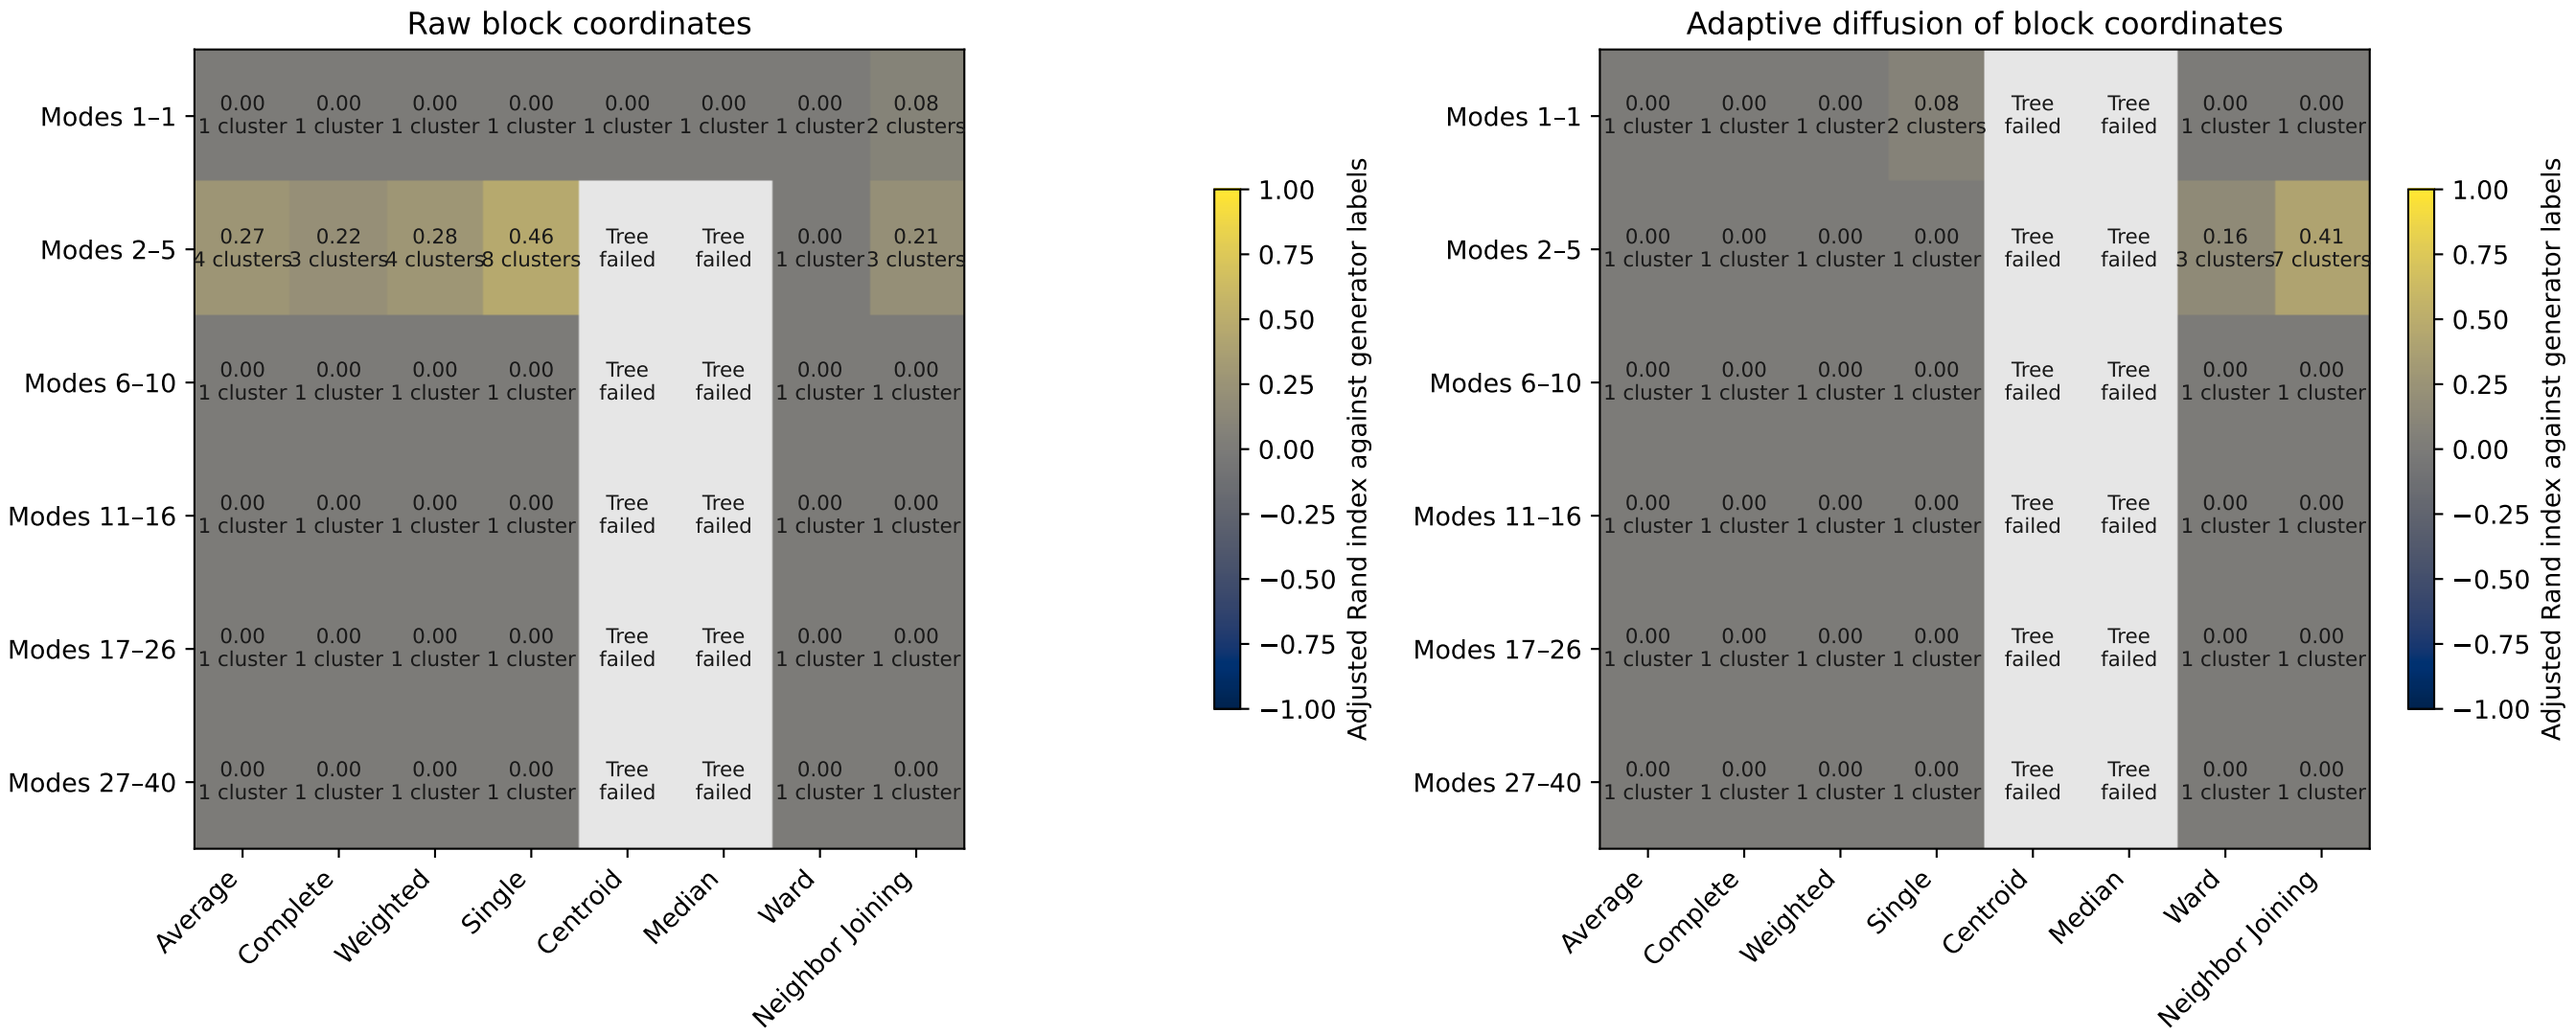

One fixed seed per example. Failed and unsupported cells are unavailable. Support thresholds are not enforced; results are descriptive.

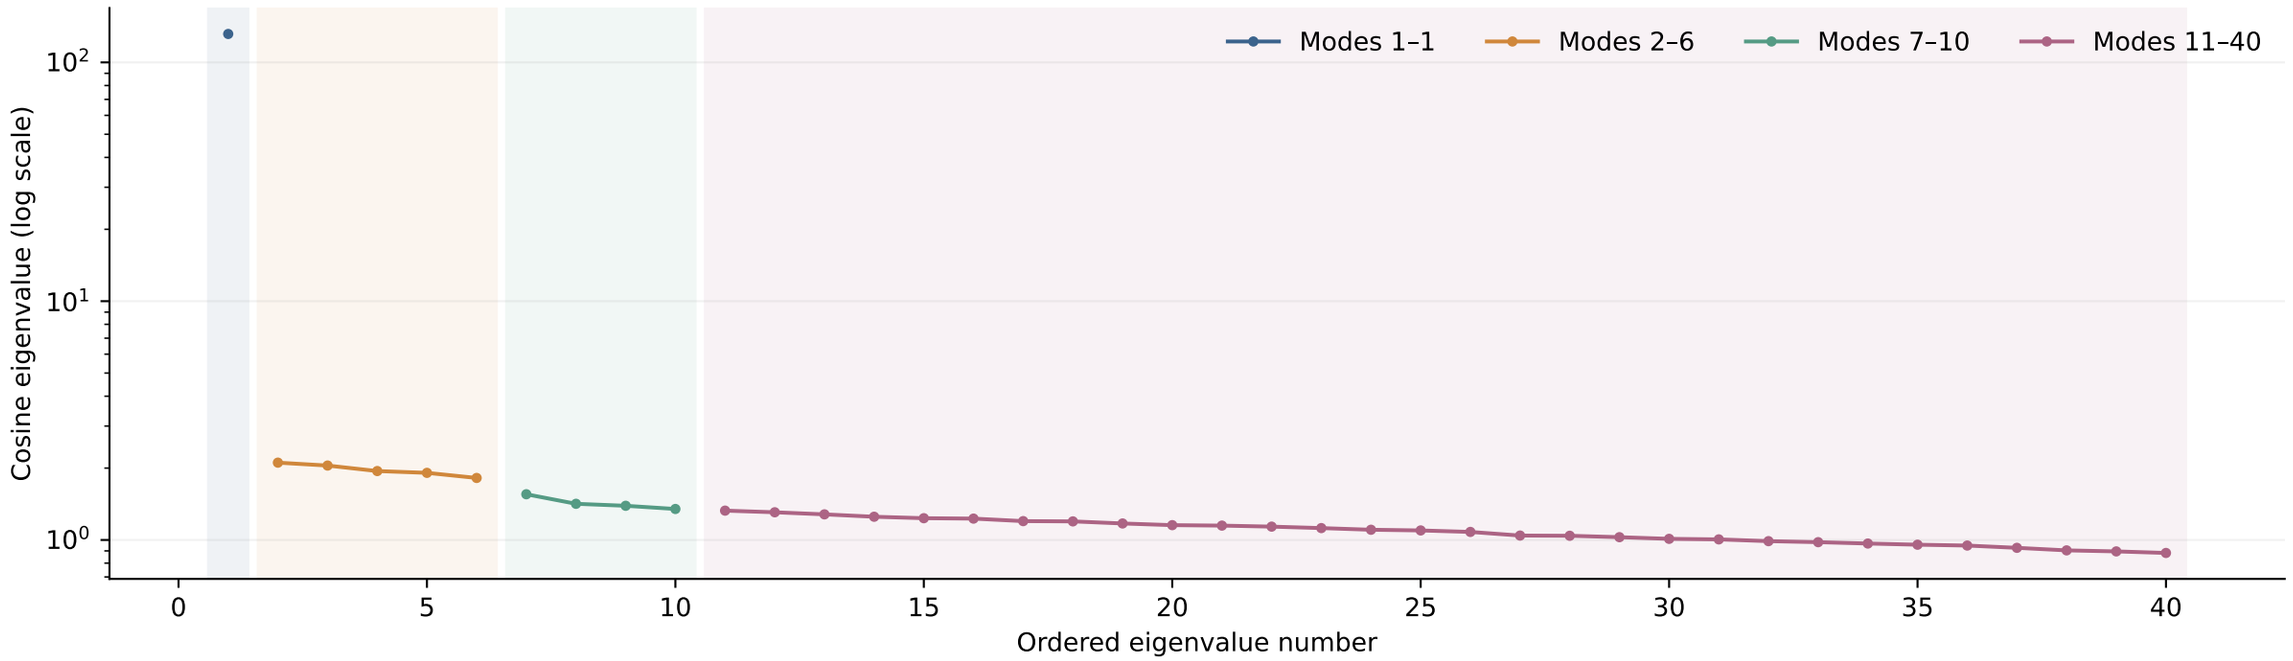

phylo brownian null 16taxa
Generator clusters: 16; each cell shows agreement and TBS cluster count

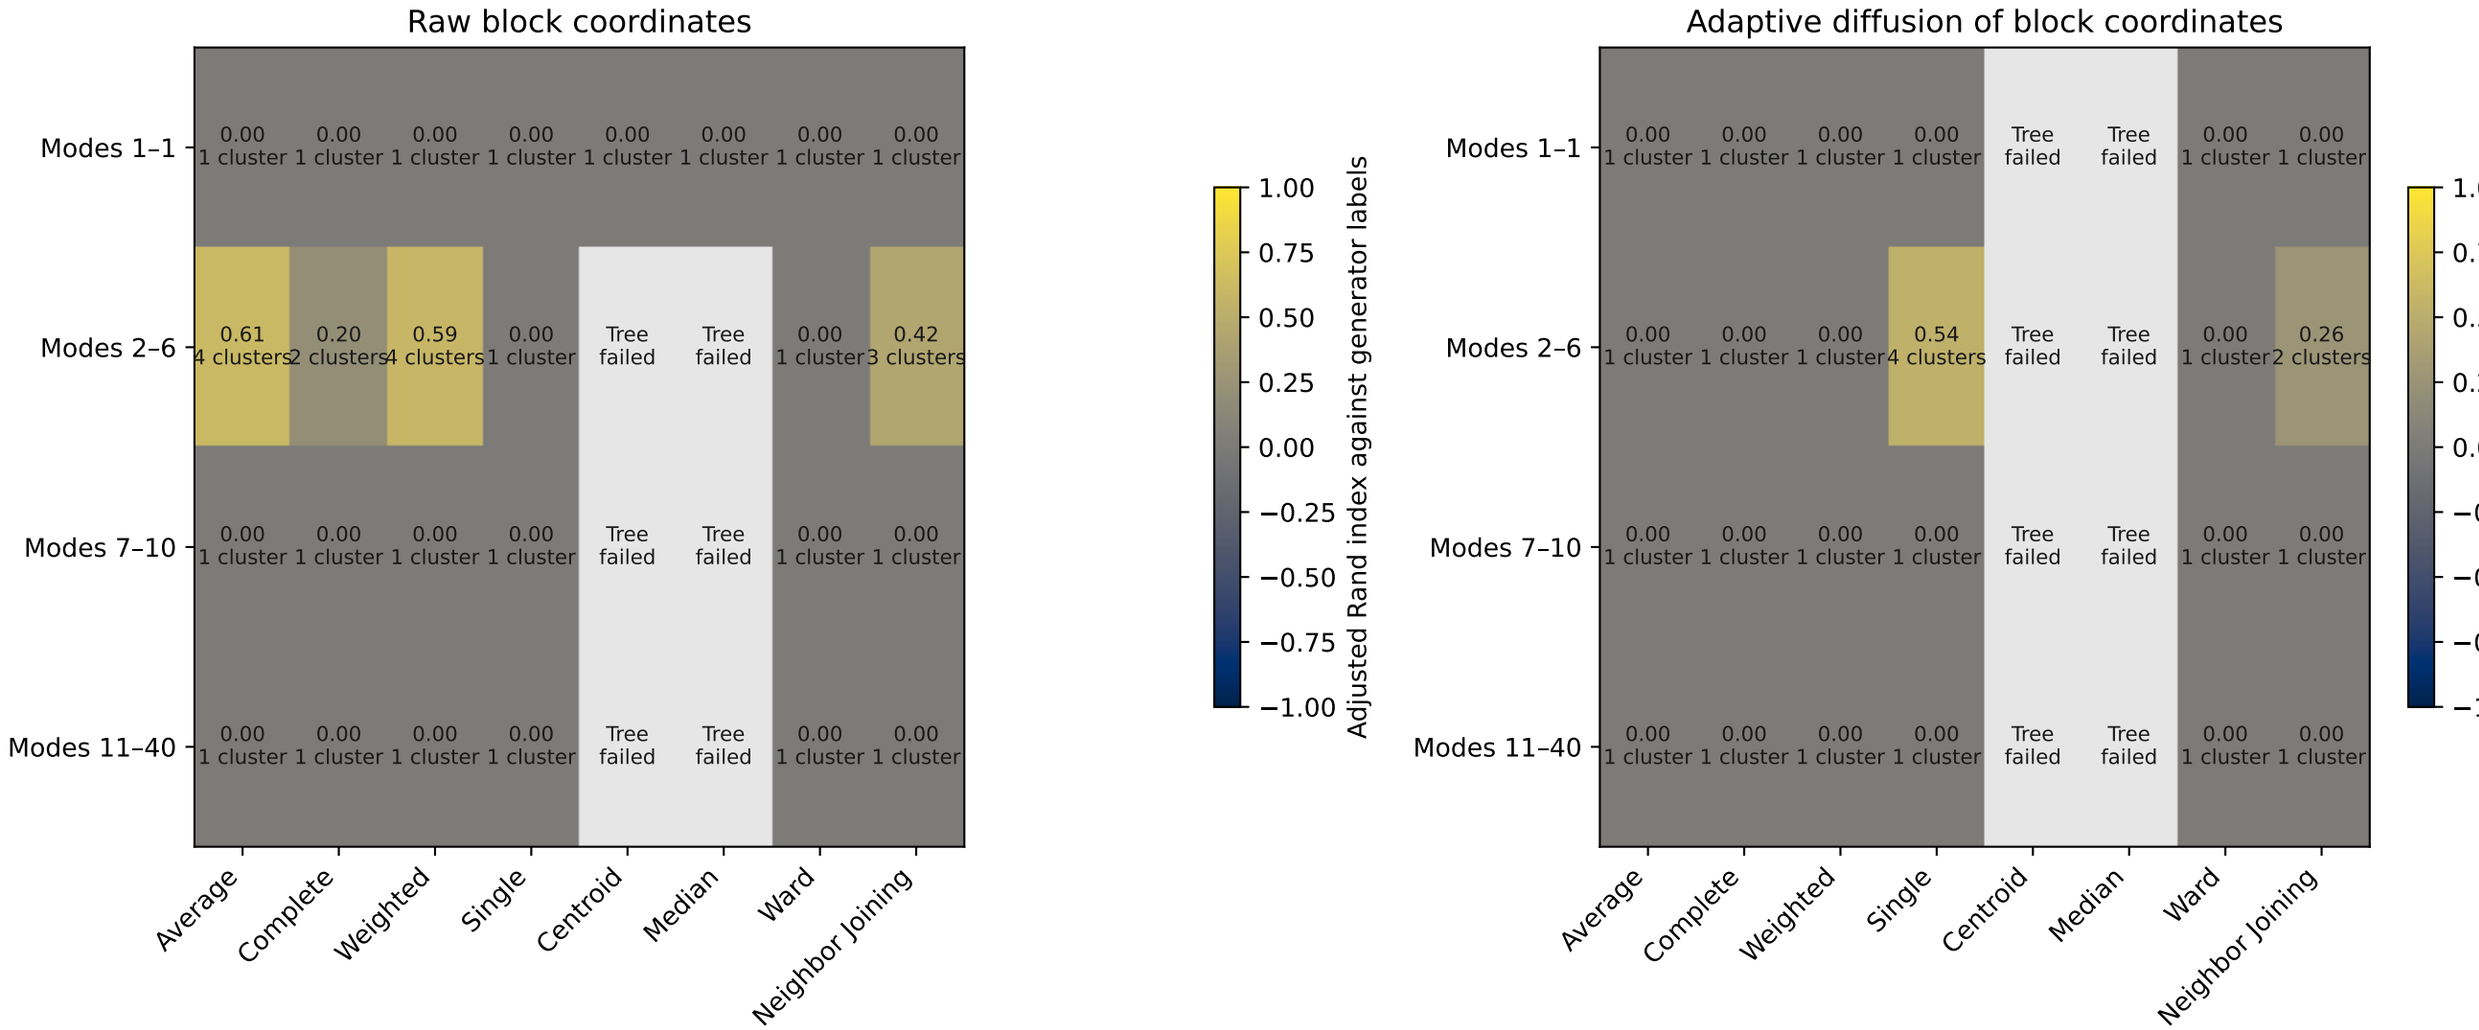

One fixed seed per example. Failed and unsupported cells are unavailable. Support thresholds are not enforced; results are descriptive.

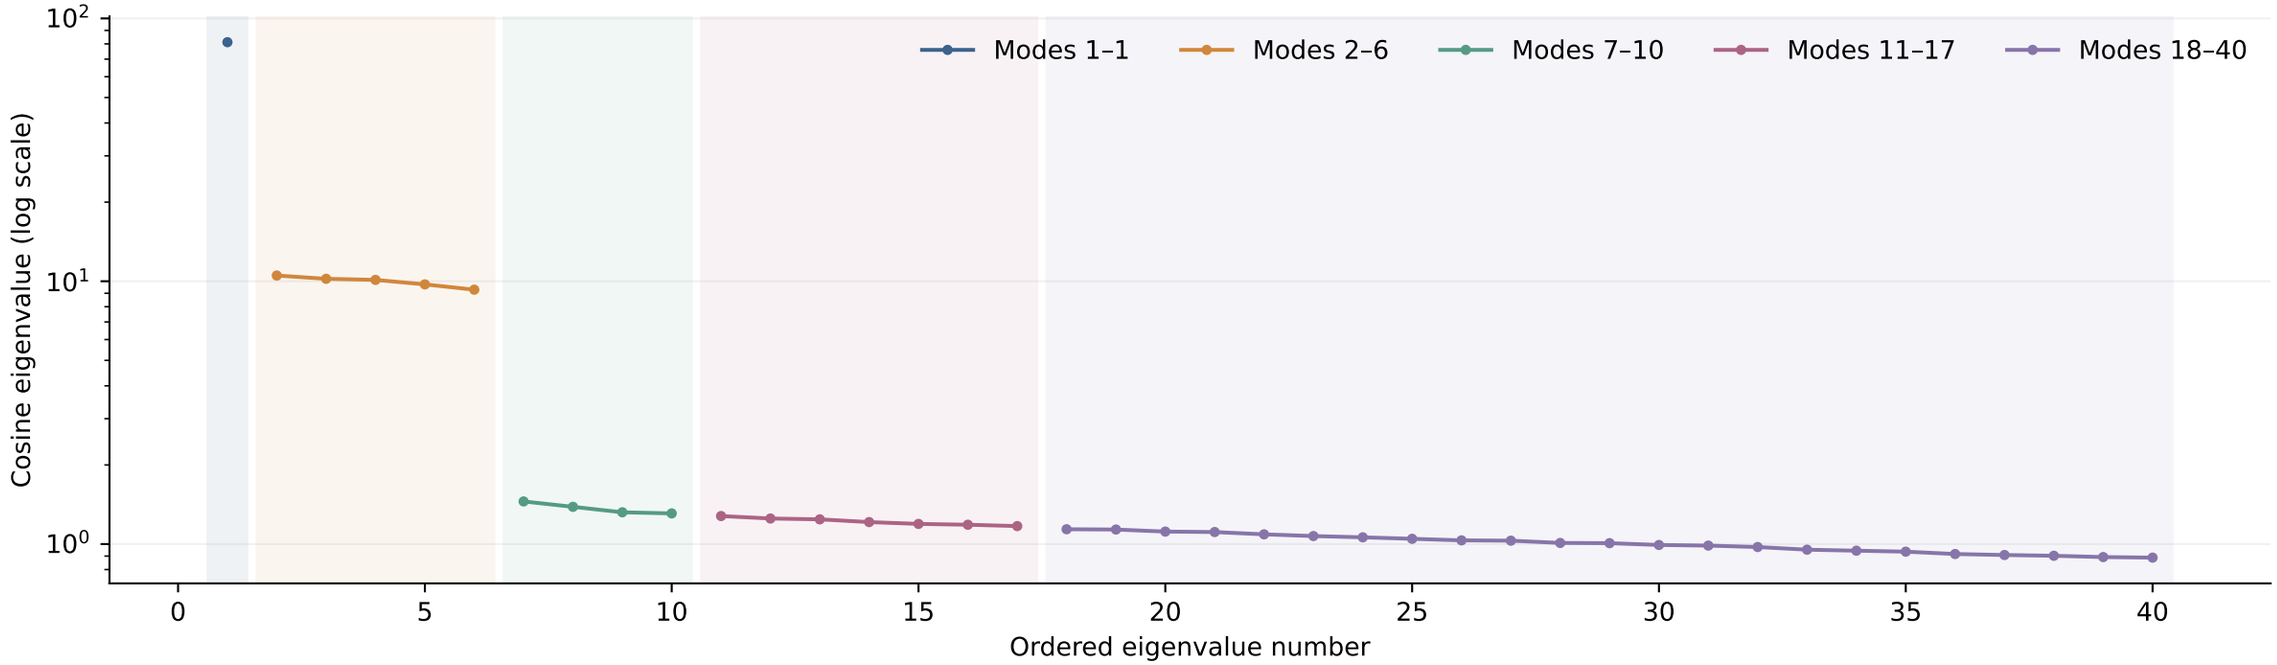

traversal deep signal under same parent
Generator clusters: 6; each cell shows agreement and TBS cluster count

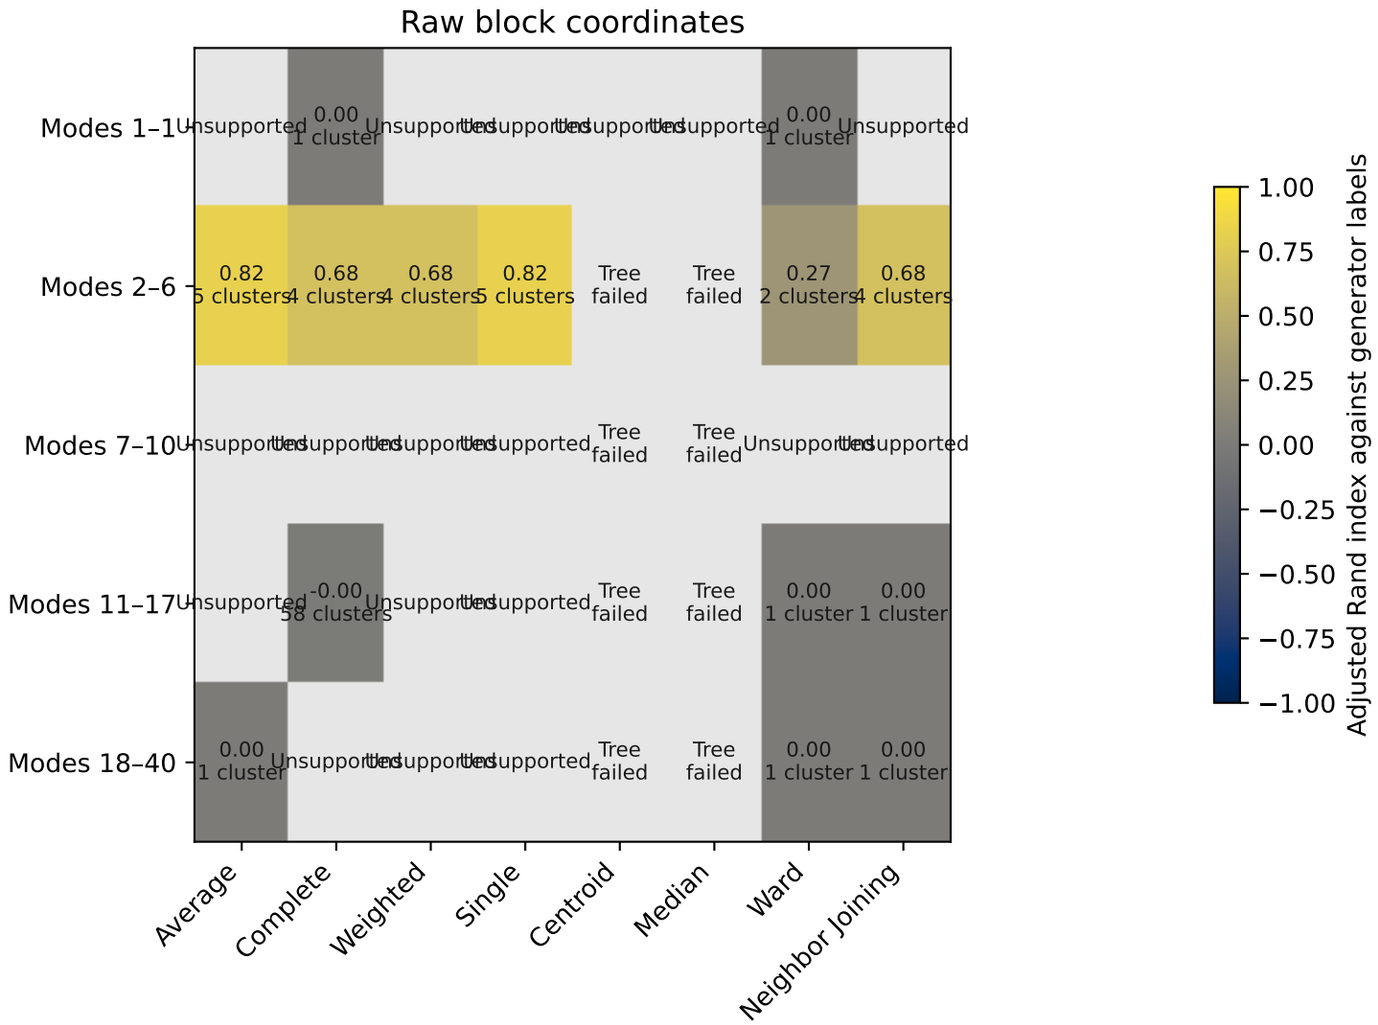

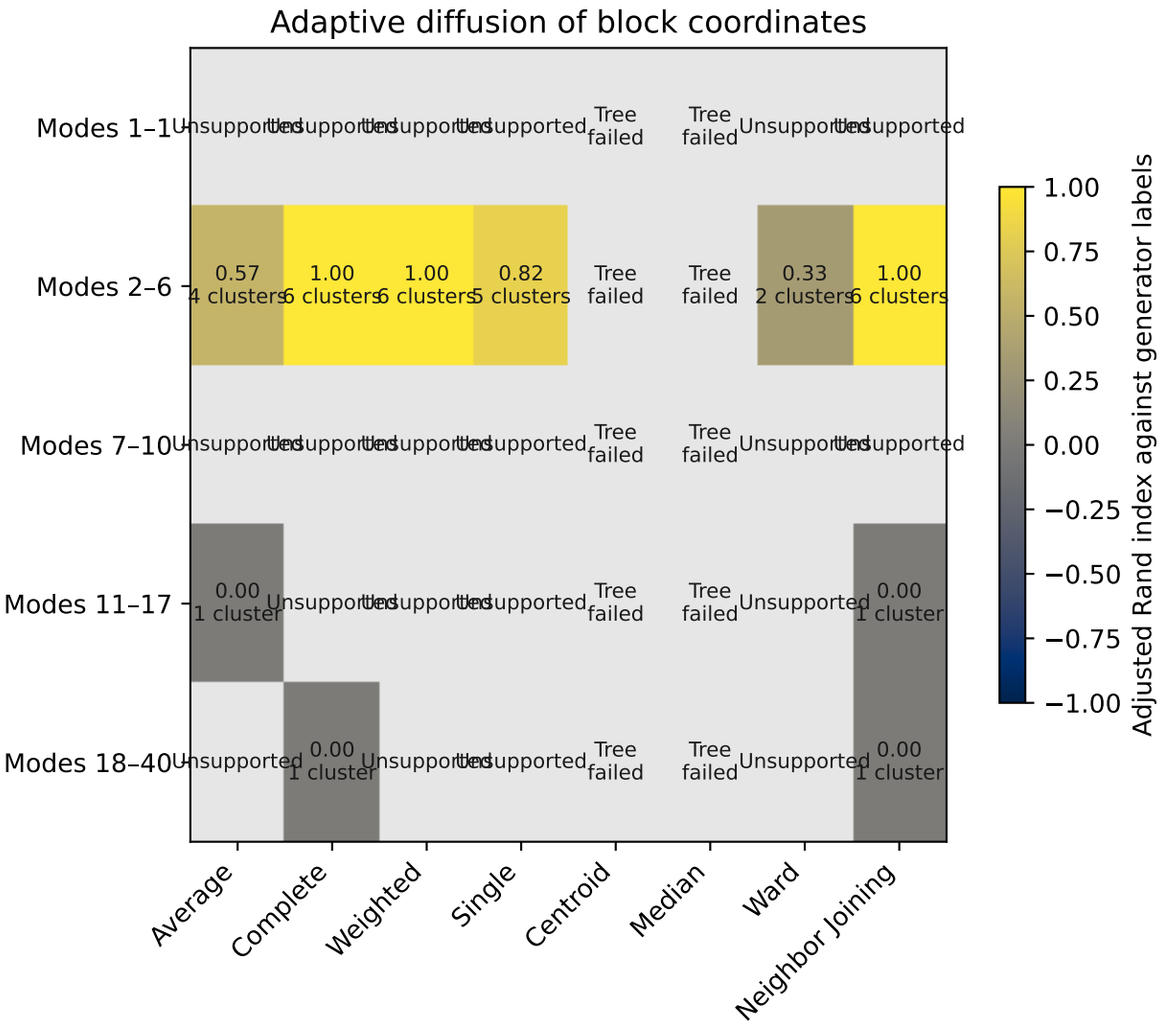

One fixed seed per example. Failed and unsupported cells are unavailable. Support thresholds are not enforced; results are descriptive.

traversal deep branch recovery stress
Generator clusters: 6; each cell shows agreement and TBS cluster count

One fixed seed per example. Failed and unsupported cells are unavailable. Support thresholds are not enforced; results are descriptive.
